BROWN DOG TICKS IN HOME

Apply Dust to infested areas of floors, carpets,
and other areas where ticks are likely to
hide. For spot treatment, apply Dust to
infested cracks and other hiding or resting
places and on exposed surfaces where insects
will crawl when they come out of hiding. For
silverfish control, baseboard areas, behind
shelving, bookcases, and storage areas should
receive particular attention. Avoid applica-
tions to areas where contamination of foodstuffs may
result. Repeat as often as necessary to maintain
effective control.

**ROACHES, SILVERFISH, WATERBUGS, BLACK
WIDOW SPIDERS:** For spot treatment, apply Dust
to infested cracks and other hiding or resting
places and on exposed surfaces where insects
will crawl when they come out of hiding. For
silverfish control, baseboard areas, behind
shelving, bookcases, and storage areas should
receive particular attention. Avoid applica-
tions to areas where contamination of foodstuffs may
result. Repeat as often as necessary to maintain
effective control.

CARPET BEETLES: Apply Dust to infested areas
of carpets, localized areas of floors, and other
areas where insects are likely to hide. For
spot treatment, apply Dust to infested cracks
and other hiding or resting places.

ANTS: Apply to ant trails and areas around door and window frames where ants may enter the house. It is frequently desirable to treat the openings around water pipes, heat ducts, electric outlets, and baseboards where ants come out into rooms from wall spaces. For control of ants in lawns, apply directly to ant hills. Repeat applications as often as needed.

BROWN DOG TICKS IN HOMES: Apply Dust around baseboards, windows, door frames, wall cracks, sleeping quarters of household pets and localized areas of floors and floor coverings where insects are present. The number of applications required will depend upon the source and degree of infestation. Fresh bedding should be placed in animal quarters following treatment. Do NOT treat pets or other animals.

ROACHES, SILVERFISH, WATERBUGS, BLACK WIDOW SPIDERS: For spot treatment, apply Dust to infested cracks and other hiding or resting places and on exposed surfaces where insects will crawl when they come out of hiding. For silverfish control, baseboard areas, behind shelving, bookcases, and storage areas should receive particular attention. Avoid applications to areas where contamination of foodstuffs may result. Repeat as often as necessary to maintain effective control.

CARPET BEETLES: Apply Dust to infested area of carpets, localized areas of floors and baseboards, and into cracks and under carpets

ANTS: Apply to ant trails and areas around door and window frames where ants may enter the house. It is frequently desirable to treat the openings around water pipes, heat ducts, electric outlets, and baseboards where ants come out into rooms from wall spaces. For control of ants in lawns, apply directly to ant hills. Repeat applications as often as needed.

BROWN DOG TICKS IN HOMES: Apply Dust around baseboards, windows, door frames, wall cracks, sleeping quarters of household pets and localized areas of floors and floor coverings where insects are present. The number of applications required will depend upon the source and degree of infestation. Fresh bedding should be placed in animal quarters following treatment. Do NOT treat pets or other animals.

ROACHES, SILVERFISH, WATERBUGS, BLACK WIDOW SPIDERS: For spot treatment, apply Dust to infested cracks and other hiding or resting places and on exposed surfaces where insects will crawl when they come out of hiding. For silverfish control, baseboard areas, behind shelving, bookcases, and storage areas should receive particular attention. Avoid applications to areas where contamination of foodstuffs may result. Repeat as often as necessary to maintain effective control.

CARPET BEETLES: Apply Dust to infested area of carpets, localized areas of floors and baseboards, and into cracks and under carpets F.N. 2371

where these pests may be found. Repeat application as often as necessary to maintain effective control.

CRICKETS: Apply Dust to baseboards, floors of closets and storage places and other hiding places. Repeat application as often as necessary to maintain effective control.

CHIGGERS AND BROWN DOG TICKS IN LAWNS AND OUTSIDE AREAS: Apply 1 lb. of Dust to 1,000 sq. ft. Complete coverage bordering pathways and walkways is necessary.

SOIL INSECT PESTS ON LAWNS AND IN ORNAMENTAL PLANT BEDS: Apply 1 lb. of Dust to 325 sq. ft. of lawn or plant bed area for the control of Ants, Japanese Beetle Grubs and White Grubs. Wash Dust into ground with sprinkler.

GROUND MOLES: Controlling soil insects helps to eliminate ground moles from an area due to destroying their food supply.

CRABGRASS PREVENTION: Apply 2½ lbs. of Dust per 100 sq. ft. of lawn area to suppress crabgrass seedlings before germination. In many areas application should be made April 15 to May 1. This treatment will not burn or injure established lawn. Wash Dust into ground with sprinkler.

NOTE: Children and pets should be kept off treated areas until this material has been thoroughly washed into the soil and grass has completely dried. Do not contaminate ornamental fish ponds. Birds feeding on lawn may be killed.
