"GET THE BEST...GET AEROSECT"

"GET THE BEST...GET AEROSECT"

KILLS: FLIES • MOSQUITOES • MOTHS • ANTS • SILVERFISH • WASPS • FLEAS • GNATS

NET WEIGHT 12 OZ

CONTAINS PYRETHRUM
NONFLAMMABLE

AEROSECT
REG. U. S. PAT. OFF.

NON-TOXIC
TO HUMANS, PETS,
PLANTS AND ANIMALS

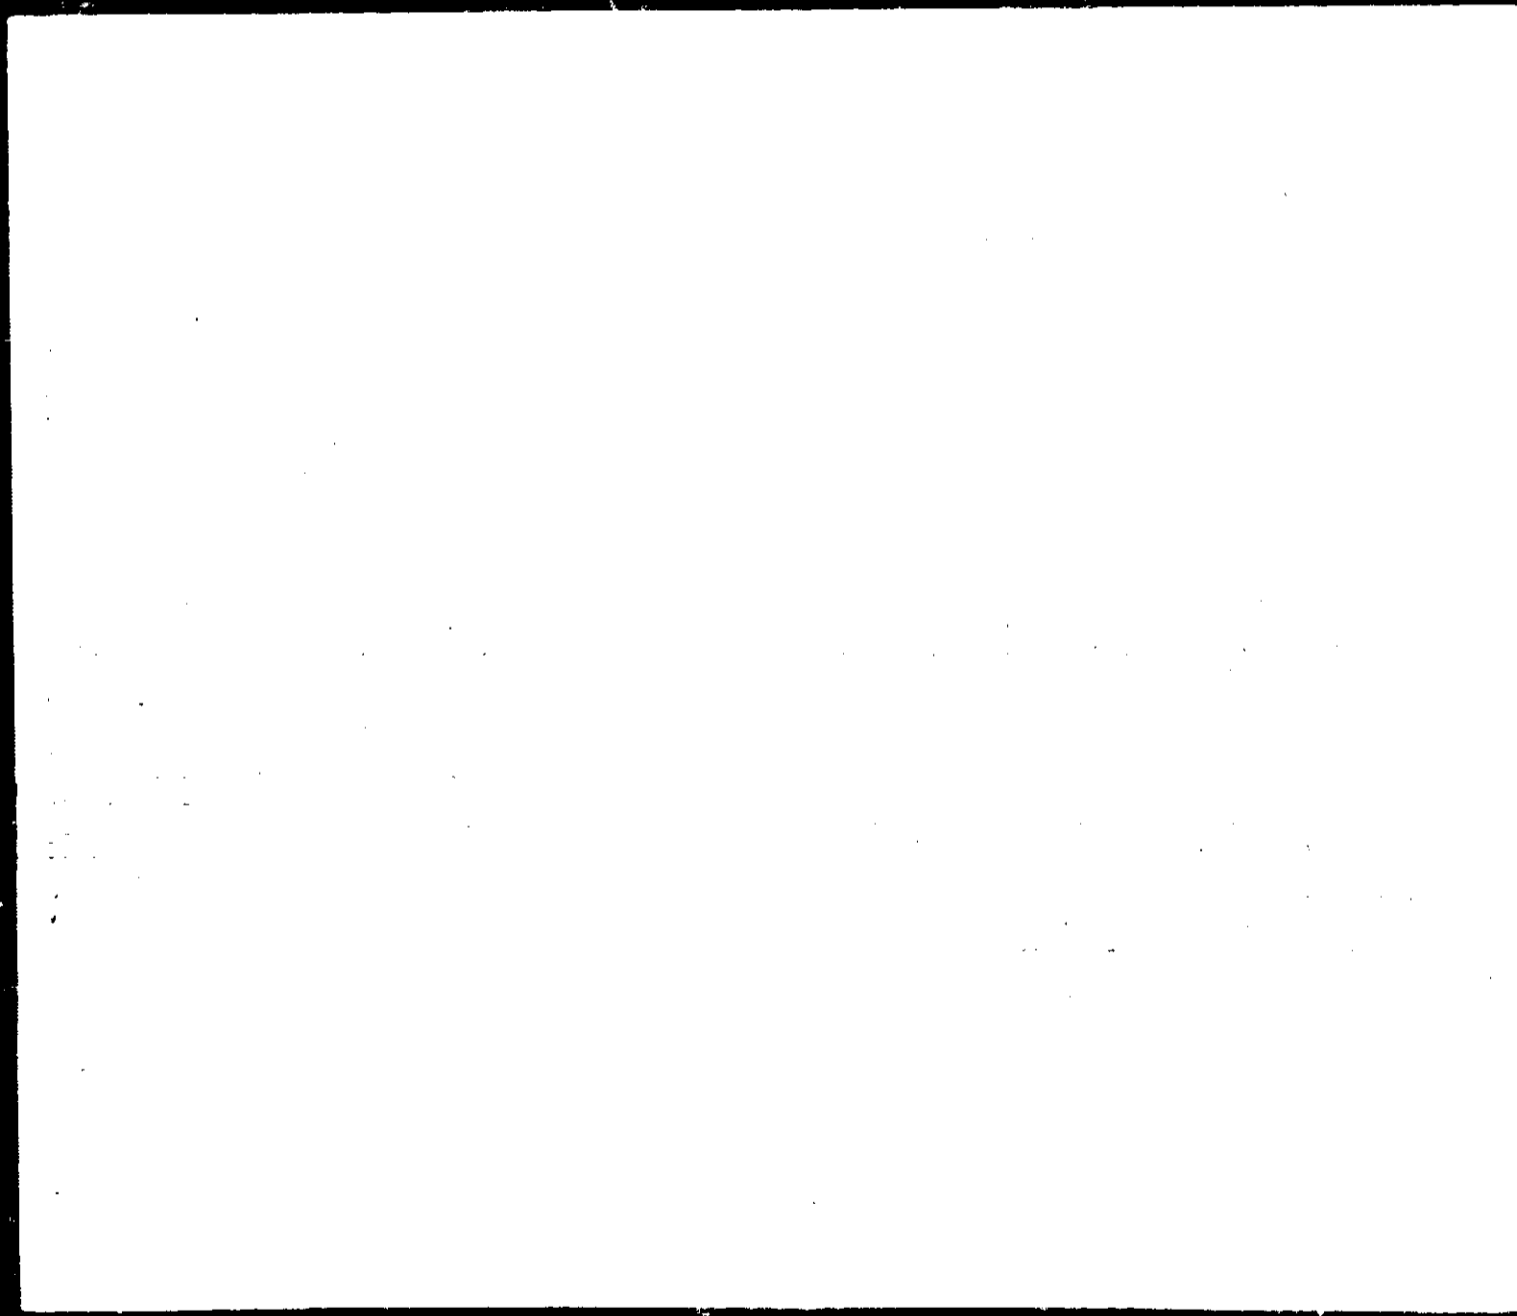

REG. NO. 107

KILLS: WATERBUGS • SPIDERS • ROACHES • HORNETS • BEDBUGS • CRICKETS

CAUTION: KEEP
OUT OF REACH OF CHILDREN

MANUFACTURED IN U.S.A. BY
PENNSYLVANIA ENGINEERING COMPANY
PHILADELPHIA, PA. 19123

AEROSECT

THE WONDER INSECTICIDE

TO PREPARE:

1. Remove metal protective cap on valve. Do not puncture valve or container with any piercing instrument.
 2. Direct tiny spray nozzle on valve away from you. Keep three feet from any object to avoid staining.
 3. Press top of valve to release desired amount of Aerosect, keeping valve upward when using. Remove finger from valve to stop.
 4. Close windows and doors and shut off ventilating fans. Open after 15 to 30 minutes, or longer if possible.
- Keep this container in cool place, never near radiator, stove, or any place over 120° F. temperature.
Cover or remove Aquana in areas to be treated.
Keep three feet away from asphalt and rubber tile when spraying. Do not puncture container or tapper with valve.

DIRECTIONS:

FLYING INSECTS: To kill smaller flying insects (flies, mosquitoes, gnats), standing in center of room, spray in all directions for about five seconds for average size room (10x10x10). For larger flying insects (hornets, wasps, flying moths) increase spraying time to 10 seconds.

CRAWLING INSECTS: To kill crawling insects (roaches, waterbugs, silverfish, crickets, thousand-leggers, spiders) direct mist into cracks, crevices, and recesses behind cabinets, sinks, stoves, baseboards, floors, etc. keeping valve upward until spray has run about 45 to 60 seconds in average size room (10x10x10).
REPEAT IF NECESSARY IN ALL CASES.

ANTS: Same as for other crawling insects, and also treat ant trails and areas around door sills and window frames.

FLEAS: Same as for other crawling insects, and also treat sleeping quarters of animals.

BEDBUGS: Thorough and repeated treatment of beds, mattresses, baseboards and wall cracks should be made.

MOB PROTECTION: Brush clothing and other articles, then spray thoroughly holding bomb three feet from articles to avoid staining. Be sure to turn lapels and pockets, and pay particular attention to all seams and folds, so the garment is completely covered with spray. Spray clothes and containers in which clothes are packed. Repeat monthly unless stored in moth-tight containers. Do not spray over 60 seconds on each application in the interior of any closet or container.

Active ingredients: Pyrethrins 0.25
 Technical Piperonyl Butoxide 2.00
 Mineral Oil 1.00
 Sesame Oil 11.75
 Inert ingredients 85.00
 Total (11 and 12)
 *Available in 1.6 (butylcarbitol) (6-propylpiperonyl) ether and 0.4% of related compounds

NON-TOXIC
TO HUMANS, PETS, PLANTS AND ANIMALS
