"GET THE BEST . . . GET AEROSECT"

FOR USE

Supermarkets • Bakeries • Restaurants • Warehouses
 Hotels and Motels • Office Buildings • Meeting Rooms
 Country Clubs • Indoor Pools

(Spray 1 second per 1,000 cubic feet for flies, mosquitoes and small flying insects)

OUTDOORS

Outdoor Swimming Pools • Barbecues and Cookouts • Picnics
 Drive-Ins • Patios and Terraces • Outdoor Restaurants
 Driving Ranges • Boats • Ships
 (When air is still, thoroughly mist grass, shrubbery and any other place where small flying insects harbor. Repeat as required.)

DIRECTIONS

Break plastic seal and remove knurled nut from valve. Attach spray hose to valve with fingers. Keep valve up when spraying. Hand hole is provided on cylinder for convenience in carrying when spraying large areas. Point the nozzle end of the hose in the direction you wish to spray, open valve and spray up or down, keeping nozzle at least three feet away from objects. Spray for time shown on label for insect you are treating. Close valve in time to allow approximately one minute to empty hose. Do not store in temperature above 140° F. Keep out of reach of children.

FLIES, MOSQUITOES, GNATS, WASPS:

Spray 1 second for 1,000 cubic feet of space. If possible keep windows and doors closed during and after spraying a minimum of 15 minutes to increase effectiveness.

ROACHES, ANTS (AND ACCESSIBLE STAGES OF) BEETLES AND WEEVILS:

Spray 15 seconds per 100 sq. ft. of floor area. Pay particular attention to crevices and cracks and hidden dark spaces. If possible keep windows and doors closed during and after spraying a minimum of 45 minutes to increase effectiveness. Repeat as required. Do not contaminate any food products.

Remove or cover aquaria in rooms in which this product is to be used.

FOR USE Dairies • Barns and Stables • Cotton and Grain Storage
 Fur Storage (Will kill adult moths, not larvae or eggs)

Grain Mills • Trailer Trucks and Vans • House Trailers
 (Spray 3 seconds per 1,000 cubic feet for flies, mosquitoes and small flying insects)

MUSHROOM HOUSES Thoroughly mist area using 4 seconds per 1,000 cubic feet of space to kill mushroom flies. Repeat as required.

Use the product as a space spray in food processing plants only when plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered or thoroughly cleaned before using.

NO KEROSENE ODOR

Net Wt.: 15 Pounds

INGREDIENTS BY WEIGHT

Active:	
Pyrethrins	5%
*Technical Piperonyl Butoxide	4.0%
Mineral Oil	2.0%
Inert:	
Dichlorodifluoromethane	93.8%
*Equivalent to 3.2% of butyricarbityl (6-propylpiperonyl ether and 0.8% of related compounds)	

FLOUR AND INDIAN MEAL MOTHS:

Spray 3 seconds per 1,000 cubic feet of space. Pay particular attention to protected spaces such as corners, machinery and boxes. Will not kill moth larvae or moth eggs. If possible, keep windows and doors closed during and after spraying a minimum of 30 minutes to increase effectiveness. Repeat as required. Do not contaminate any food products.

FLYING ADULT MOTHS:

Spray 1 second per 1,000 cubic feet of space. Expose clothing, particularly folds and pockets to mist. Close area minimum of 45 minutes to increase effectiveness. Repeat as required, but no oftener than twice a week or closer than three feet to avoid staining clothing. Will not kill moth larvae or moth eggs.

U.S. Patent Nos. 2,956,708
 2,355,550

CAUTION:

Keep out of reach of children.
