USES AND DIRECTIONS: Except where indicated, repeat treatments when necessary to keep pests under control. This shaker-type can can be used in many situations; for treating large areas, a hand dust gun is needed. **INDOORS:** Dust only areas inaccessible to children and pets. **Roaches**—(Cockroaches, "Waterbugs")—Apply as a spot treatment to cracks, crevices and other hiding places or runways. **Ants**—Apply to runways. Dusting the outside walls and foundation may help keep ants from entering the home. **Crickets**—Apply as spot treatment to corners, baseboards, under cabinets, in closets, etc. **Silverfish, Firebrats**—Apply to infested areas, corners in closets, behind radiators, around pipes. **Spiders, Centipedes, Scorpions**—Dust infested area along baseboards, door sills, behind shelving, damp basement corners, storage areas, and around pipes where pests are noticed or may hide. **Brown Dog Ticks**—Treat sleeping quarters of pets and replace bedding. Do not treat the animals. Apply as a spot treatment to cracks, crevices, and hiding places. **OUTDOORS (Lawn, Garden, Ornamental Plants): Earwigs**—Dust infested area around flower gardens as soon after young earwigs come out of the soil in the spring, again in midsummer if necessary. Use 6 ounces of dust for 500 square feet. Thorough treatment may make indoor treatments unnecessary. **Mole**
