Mr. Lloyd M. Ferdinandsen  
Watkins Products, Inc.  
150 Liberty Street  
Winona, MN 55987-0500

Dear Mr. Ferdinandsen:

Subject: Finished Labeling for Watkins Pyrethrins  
EPA Registration No. 99-106

The labeling submitted with your letter of April 1, 1986 is acceptable at this time. However, since your product contains a high amount of petroleum distillate, the following Statement of Practical Treatment must appear in addition to the existing Statement of Practical Treatment:

If Swallowed - Do not induce vomiting because of aspiration hazard. Call a physician immediately.

This label change must be completed at the time of the next label printing or 1 year from the date of this letter.

Sincerely yours,

Arturo E. Castillo  
Product Manager (17)  
Insecticide-Rodenticide Branch  
Registration Division (TS-767C)

# WATKINS PYRETHRUM FLY SPRAY

## PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

### CAUTION KEEP OUT OF REACH OF CHILDREN

**HARMFUL IF SWALLOWED:** Avoid contamination of feed and foodstuffs.

Food and food processing surfaces should be covered or removed during treatment or thoroughly cleaned before using. When using the product in these areas,

apply only when the facility is not in operation. Avoid contact with skin, eyes,

or clothing. In case of contact, flush skin and eyes with plenty of water for at

least 15 minutes. Get medical attention if irritation persists. Remove pets and

birds, and cover fish aquariums before spraying.

### ENVIRONMENTAL HAZARDS

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not con-

taminate water by cleaning of equipment or disposal of wastes.

### PHYSICAL OR CHEMICAL HAZARDS

**DO NOT USE, POUR, SPILL, OR STORE NEAR HEAT OR OPEN FLAME**

### DIRECTIONS FOR USE

This is a violation of Federal law to use this product in a manner inconsistent with

its labeling.

### SPRAYING DIRECTIONS

This product may be used in places where edible products are handled. In-

posed edible products must be removed, covered, or stored in closed con-

tainers. Facilities and equipment must be thoroughly washed with an effective

cleaning compound and rinsed with potable water after spraying.

**HOUSING, STABLES, MOSQUITOES, MIDGE, AND**

**GNATS:** Close windows and doors, and cover all foods to prevent contamination. Start at ceiling and fill room completely with fog. Do not remain in

treated areas. After 10 to 15 minutes ventilate the area. Open windows and

doors and sweep up and destroy dead insects.

**CLOTHES, NIGHTS AND CARPET BEETLES:** Thoroughly clean

garments and other articles. Spray thoroughly, especially seams and pockets

before storage; clean and spray interior of closets, trunks, and chests

and keep closed for at least 30 minutes. Repeat once or twice monthly as

needed. To kill clothes moths in upholstery, saturate interior fabric completely.

Repeat, as necessary.

### STORAGE AND DISPOSAL

**STORAGE — DO NOT CONTAMINATE WATER, FOOD OR**

**FEED BY STORAGE OR DISPOSAL. KEEP PRODUCT IN**

**ORIGINAL CONTAINER UNDER TIGHT STORAGE.**

**PESTICIDE DISPOSAL — WASTES RESULTING FROM THE**

**USE OF THIS PRODUCT MAY BE DISPOSED OF ON SITE OR**

**AT AN APPROVED WASTE DISPOSAL FACILITY.**

**CONTAINER DISPOSAL — TRIPLE RINSING CONTAINER FOR**

**DISPOSAL. THEN OIL FOR RECYCLING OR RECONDITION**

**ING, OR BURN AND DISPOSE OF IN A SANITARY LAND**

**FILL OR BY OTHER PROCEEDURE AS APPROVED BY STATE AND**

**LOCAL AUTHORITIES.**

### FOGGING FARM BUILDINGS

To control mosquitoes, midges, and gnats.)

1. Remove all animals from building before fogging.

2. Close doors and windows to prevent drafts. This saves spray and fills barn

more uniformly.

3. Direct sprayer toward ceiling and sides of barn, fogging entire area. For

small areas, place sprayer at one end and only

4. Leave barn closed for about 10 minutes. Do not remain in treated areas.

5. Ventilate the area after treatment is completed.

The ideal time to fog is in the evening when the fly population is highest.

For a severe fly problem, also use a residual spray combined with a good

sanitation program around your premises. Avoid contamination of milk,

milk utensils, and feedstuffs.
