

SWAT FOR DAIRY CATTLE
(Contains RABON Oral Larvicide)

To prevent the development of Horn Flies, Face Flies, House Flies and Stable Flies in the man-
ure of treated cattle.

ACTIVE INGREDIENT	BY WEIGHT
2-chloro-1-(2,4,5-trichlorophenyl) vinyl dimethyl phosphate	6.60%*
INERT INGREDIENTS	93.40%**
TOTAL	100.00%

*Each pound contains 29.9 grams RABON.®
**Refers only to ingredients which are not larvicidal

GUARANTEED ANALYSIS	
Crude Protein, not less than	13.00%
Crude Fat, not less than	2.50%
Crude Fiber, not more than	9.00%

FEED INGREDIENTS
Processed Grain By-Products

KEEP OUT OF REACH OF CHILDREN
CAUTION

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.
STORAGE:
Store in a dry place not accessible to children or pets.
PESTICIDE DISPOSAL:
Pesticide, spray mixture or rinseate that cannot be used according to label instructions must be disposed of according to Federal, State or local procedures under the Resource Conservation and Recovery Act.
CONTAINER DISPOSAL:
Dispose of bins according to approved Federal, State or local procedures under the Resource Conservation and Recovery Act.
 See reverse side of tag for use directions and other precautions.

ACCEPTED
JUL 17 1981
Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No.

EPA Reg. No. 99-121
EPA Est. No. 99-MN-1

25.0	31	0.01	2 lbs. 2 oz.
30.0	26	0.01	1 lb. 13 oz.

INDIVIDUAL USE LEVELS

(Use Appropriate Measuring Spoon)

Feed Swat for Dairy Cattle at the rate of 1/2 to 1 ounce per animal per day to animals weighing between 400-800 pounds by incorporating it into the daily ration of top dress on grain or roughage. Cattle weighing between 800-1200 pounds should be fed 1 to 2 ounces per animal per day. Cattle 1200-1600 pounds should be fed 1 1/2 to 2 ounces per animal per day.

Start feeding early in the spring before the flies start to bite and continue feeding throughout the summer and into the fall until cold weather restricts fly activity.

Rations containing RABON ORAL FLYRICIDE are safe for up to 4 months and to lactating dairy cows without withholding the milk from most animals after treatment.

Swat for Dairy Cattle can be fed to dry cows, non-lactating animals and lactating cows.

Swat for Dairy Cattle prevents the development of horn flies, house flies and stable flies in the manure of treated cattle, but it is not effective against existing adult flies.

In some cases, supplemental fly control measures may be needed in and around dry lots, calf pens and barns to control adult horn flies and stable flies which can breed from cattle manure, but in other decaying vegetable matter or silage on the premises.

In order to achieve optimum fly control Swat for Dairy Cattle should be used in conjunction with other good sanitation and management practices.
