

Proposed Revised Labeling For
Diazinon® 4E - Food Handling Establishments
EPA Reg. No. 100-463

DIRECTIONS FOR USE

APPLICATIONS WITHIN FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS

Limited to Crack and Crevice Treatment Only - Apply a small amount of material in a ½-1% solution directly into cracks and crevices such as expansion joints between different elements of construction or between equipment bases and the floor, wall voids or hollow equipment legs where cockroaches, ants, spiders, and silverfish hide. Aids in the control of pantry pests (exposed stages of sawtooth grain beetle, flour beetle, rice weevil, cigarette beetle, drugstore beetle, and Indian meal moth) which come in contact with treated surfaces. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

Applications of this product in the food areas of food handling establishments, other than as a crack and crevice treatment, are not permitted.

NOTE: Diazinon 4E is not recommended for use in conduits, motor housings, junction or switch boxes because of shock hazard. See Directions for Use for CIBA-GEIGY's Diazinon 2D.
