Pressurized

Kills: Cockroaches
Waterbugs
Ants, Silverfish
Brown dog ticks
Spiders
Crickets, Earwigs
Sowbugs, Flies
Mosquitoes
Flying moths
Wasps

other insects... as specified
in label directions

For use in and
around the home.

No unpleasant odor.

Does not contain
chlorofluorocarbon
propellants.

Contains DZN®

Caution:

Keep out of reach
of children.

See additional caution
statements on back
of container.

Active Ingredients:	
O,O-diethyl O-(2-isopropyl-6-methyl-4-pyrimidinyl) phosphorothioate	0.500%
Pyrethrins	0.052%
Technical piperonyl butoxide (equivalent to 0.209% [butyl-carbonyl] [6-propylpiperonyl] ether and 0.052% other related compounds)	
Petroleum distillate	95.862%
Inert Ingredients:	3.325%
Total:	100.000%

Net Wt.

1 lb. 2oz.

Application

Hold can upright and spray infested surfaces until wet. Do not use as a space spray. Do not spray on pets or desirable plants. Avoid excessive wetting of asphalt tile, rubber, and plastic materials.

Directions for Use

Indoors*

Cockroaches (Waterbugs), Ants, Firebrats, Silverfish, Sowbugs (Pillbugs), Springtails, Spiders, Crickets, Earwigs: Spray until wet, surfaces behind and beneath cabinets, refrigerators, sinks, stoves, ant trails, and other localized areas infested with insects. Spray window and door frames where ants enter. Treat inaccessible areas, voids around water pipes, cracks, and crevices along baseboard moldings. Repeat as necessary.

Carpet beetles: Make localized application to areas of the floor and baseboards. Spray directly into cracks and under carpets where insects may be found. Treat crevices, cracks, and infested areas of shelving in closets. Repeat as necessary.

Brown dog ticks: Spray infested areas around baseboards, window and door frames, wall cracks, sleeping quarters of pets, and localized areas of floors and floor coverings. Repeat as necessary. Fresh bedding should be placed in animal quarters after treatment. Do not treat animals.

Spiders: Apply spray around windows, doors, and along baseboards. Make spot applications to other areas over which these pests may crawl.

Surfaces behind and beneath cabinets: Roaches, ants, silverfish—as a supplement to good housekeeping, spray surfaces behind and beneath cabinets where insects tend to hide. Spray until wet. Remove all food before spraying. Infested food packages should be destroyed.

*Do not use in edible products areas of food processing plants, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed.

Outdoors

Flies, Mosquitoes, Wasps, Flying moths: For outdoor use only as an aid in reducing annoyance from these insects. Spray outside surfaces of screens, doors, window frames or wherever these insects may enter. Treat dark corners and localized resting areas, under eaves, on porches, around patios, and garages. Repeat as necessary. Also treat surfaces

around light fixtures on porches, in garages, and other places where these insects alight or congregate.

Chiggers, Ants, Brown dog ticks, Clover mites: For treatment of localized infestations of insects in outdoor areas where there is no vegetation to be used for food or feed, spray infested areas. For ants, wet hills and runways. Repeat as necessary.

Porches, Patios, Garages, and other areas around the house where insects hide and congregate: To help keep flies, mosquitoes, wasps, and flying moths from entering the house, treat outdoor areas where these insects congregate. This treatment can be an effective addition to total pest control.

Caution:
Keep out of reach of children.

Harmful if swallowed. Avoid contamination of feed and foodstuffs. Avoid inhalation and skin contact; wash thoroughly after using. Do not use on household pets and humans. Do not allow children in treated areas until surfaces are dry.

Flammable

Contents under pressure. Do not use near fire, sparks, or flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

Disposal

Do not use empty container. Wrap container and put in trash collection.
