

# Atraton<sup>®</sup>

## 80W

### Herbicide

For nonselective weed control on industrial sites and noncrop areas.

Do not use on agricultural lands.

Active Ingredients:	80%
2-chloro-4-ethylamino-6-isopropylamino-s-triazine .....	71.3%
Related Compounds ..	3.7%
2-methoxy-4, 6-bis (isopropylamino)-s-triazine .....	5.0%
Inert Ingredients:	20%
Total:	100%

Atraton<sup>®</sup> 80W is a wettable powder

### Caution:

Keep out of reach of children. See additional caution statements on back of bag.

**DIRECTIONS FOR USE AND CONDITIONS OF SALE AND WARRANTY**

**IMPORTANT:** Read the entire **Directions For Use** and the **Conditions Of Sale And Warranty** before using this product.

**Conditions Of Sale And Warranty**

The **Directions For Use** of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application all of which are beyond the control of Geigy or the Seller. All such risks shall be assumed by the Buyer.

Geigy warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions For Use**, subject to the inherent risks referred to above. Geigy makes no other express or implied warranty of **Fitness or Merchantability** or any other express or implied warranty. In no case shall Geigy or the Seller be liable for consequential, special or indirect damages resulting from the use or handling of this product. Geigy and the Seller offer this product, and the Buyer and user accept it, subject to the foregoing **Conditions Of Sale and Warranty** which may be varied only by agreement in writing signed by a duly authorized representative of Geigy.

**General Information**

Atraton 80W is a nonselective herbicide for use on non-crop areas. Atraton 80W can be applied before or after plant growth begins. Although Atraton 80W has some foliage activity most of its activity is through root absorption. Therefore, **rainfall is required to move it into the root zone.** Very dry soil conditions and lack of sufficient rainfall may result in poor weed control. If post-emergence applications are made, weeds should be young and growing actively.

Use only in areas where complete control of broadleaf and grass vegetation is desired, such as 1) railroad, highway and utility rights-of-way, 2) petroleum tank farms, 3) industrial sites, 4) lumber yards, 5) around warehouses and chemical plants, and 6) along industrial fence lines. When applied to the soil, this product usually inhibits plant growth for one year or more. It should not be used on land to be cropped or near adjacent desirable trees, shrubs, or plants or injury may occur.

Atraton 80W is noncorrosive to equipment. Store Atraton 80W in a dry place.

**Directions for Use**

Use sufficient water to assure thorough ground and plant coverage. Use at *least* 1 gallon of water for each pound of Atraton 80W; more water may be practical where weed growth is heavy. Mechanical, bypass, or jet agitation is necessary to keep Atraton 80W in suspension during application.

To control annual broadleaf and grass weeds

(such as barnyardgrass, cheatgrass, crabgrass, lambsquarters, foxtail, ragweed, puncturevine) and biennials (such as, turkey mullein): Broadcast 6 - 12 1/2 lbs. of Atraton 80W per acre.

To control most annual and many perennial broadleaf and grass weeds (such as, bluegrass, burdock, Canada thistle, dogfennel, orchard grass, plantain, quackgrass, purpletop, redtop and smooth brome): Broadcast 12 1/2 - 25 lbs. of Atraton 80W per acre.

To control hard-to-kill biennial and perennial weeds (such as, bull thistle and sow thistle): Broadcast 25 - 50 lbs. of Atraton 80W per acre.

For longer residual control in regions of high rainfall and a long growing season apply 25 - 50 lbs. of Atraton 80W per acre.

For small areas, 4 1/2 oz. per 1,000 sq. ft. is equivalent to 12 1/2 lbs. per acre.

**Caution:**

Keep out of reach of children. Harmful if swallowed. Avoid contact with eyes, prolonged contact with skin, inhalation of dust and contamination of food and feed.

Do not contaminate domestic or irrigation water supplies or lakes, streams or ponds.

Do not reuse container. Destroy when empty.
