Envelop in a fine fog. Use fog in killing flies for many critical areas.

In fogging stables and barns to control flies, use one pint per 50,000 cubic feet of space, closing doors and windows. If animals are present, they should not be sprayed

Adult mosquito control in residential areas, municipalities, tidal marshes, swamps, woodland, livestock pastures, feed lots and pastures including dairy cattle: Envelop total area to be treated with a fog. Pay particular attention to all zones of stagnation, ponds, etc. Apply 1 gallon of diluted Carmel Formula MU-17 per acre (equivalent to approximately 0,2 lbs. actual Dibrom per acre of marsh, swamp, pastures, woodlands, grass and foliage. Fogging for mosquito control is only one phase of effective mosquito control. "Standing water" should be treated for mosquito larvae with a suitable larvicide.

Most successful fogging is done after sunset in the evening, when the earth drops to a temperature less than that of the overlying air. This results in the fog hugging the ground and drifting widely through grass and foliage. Use prevailing wind direction to plan fogging operation. Start at farthest point down-wind and work into the wind at cross angle. If wind becomes strong enough to rapidly dissipate fog, discontinue operation until wind settles.

WARNING

Antidote: If swallowed, give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear. Have victim lie down and keep quiet Call a physician immediately.

CAUTION

Poisonous by skin contact, inhalation, or swallowing. Rapidly absorbed through the skin. If on skin, wash immediately with soap and water. In case of contact, immediately remove all contaminated clothing and flush the skin and eyes with plenty of water for at least 15 minutes. For eyes, get medical attention. Do not breathe fog or spray mist. Wash thoroughly with soap and water after handling and before eating and smoking; wear clean clothing. Atropine is antidotal. Keep away from heat and open flame.

Antidotes: If swallowed, give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear Have victim lie down and keep quiet. Call a physician immediately,

This product will kill fish. Keep out of lakes, streams and ponds. Shrimp and crab may be killed at application rates recommended on this label.

IMPORTANT: Rinse equipment and containers, and dispose of wastes by burying in non-crop lands away from water supplies. Containers should be disposed by punching holes in them and burying with wastes, or by burning. (Keep out of smoke).

Do not get in eyes, on skin, or on clothing. Use waterproof gloves and face shield or goggles when handling the concentrate. Avoid storage near feed and food products.
