

Aquazine™

Algicide

For algae control in swimming pools, large aquariums, ornamental fish ponds, and fountains

Active Ingredient:

Simazine: 2-chloro-4,6-bis
(ethylamino)-s-triazine

80%

Inert Ingredients:

20%

Total:

100%

Aquazine is a wettable powder

Caution:

Keep out of reach of children.

Harmful if swallowed. Avoid inhalation of dust. Avoid contamination of food and feed.

Do not use in bodies of water with natural runoff. Do not discharge treated water where it will drain into natural bodies of water. Apply this product only as specified on this label.

Do not reuse container. Destroy when empty.

Store in a dry place.

DIRECTIONS FOR USE AND CONDITIONS OF SALE AND WARRANTY

IMPORTANT: Read the entire **Directions for Use** and the **Conditions of Sale and Warranty** before using this product.

Conditions of Sale and Warranty

The **Directions for Use** of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and should be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application all of which are beyond the control of CIBA-GEIGY or the Seller. All such risks shall be assumed by the Buyer.

CIBA-GEIGY warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions for Use**, subject to the inherent risks referred to above. **CIBA-GEIGY makes no other express or implied warranty of Fitness or Merchantability or any other express or implied warranty.** In no case shall CIBA-GEIGY or the Seller be liable for consequential, special, or indirect damages resulting from the use or handling of this product. CIBA-GEIGY and the Seller offer this product and the Buyer and user accept it subject to the foregoing **Conditions of Sale and Warranty** which may be varied only by agreement in writing signed by a duly authorized representative of CIBA-GEIGY.

General Information

Aquazine is an algicide that effectively prevents and controls the growth of algae in swimming pools, large aquariums, ornamental fish ponds, and fountains. There is no waiting to swim after application. Aquazine may be used in the above bodies of water containing fish or aquaria plants. The effectiveness of Aquazine is not influenced by the normal range of swimming pool water pH.

Aquazine is compatible with all pool additives, is non-foaming, will not stain, and is non-corrosive to pool filters, heaters, piping, and fittings. Pool filtering systems will not reduce the effectiveness of Aquazine. The use of Aquazine will not replace the need for chlorine to maintain proper pH and sanitation, but does relieve the need for excessive quantities of chlorine to combat algae.

Mixing Instructions

Mix the correct dosage in a container of clear water, shake or agitate thoroughly, and evenly distribute the mixture over the water to be treated.

Calculation of Water Volume

To determine the gallons of water in a body of water with a rectangular or square surface, multiply the length x width x average depth x 7.5. If the surface of the body of water is oval or round, multiply in feet the length x width x average depth x 5.9.

Directions for Use

Swimming Pools

Aquazine may be poured into the skimmer or evenly distributed around the edge of the pool. Water temperature of 80° F or greater results in faster algae control.

Precaution: Do not use treated water on plants or lawns as Aquazine and other pool additives could cause damage.

Preventive Algae Treatment: Apply 1 1/3 oz. of Aquazine (0.8 ppm simazine) per 10,000 gals. of water that is visibly clean. Repeat every 8-10 weeks or when algae reappear.

Green Algae Control: Apply 2 oz. of Aquazine (1.06 ppm simazine) per 10,000 gals. of water when algae growth is first visible. Seven days later, brush algae from walls, vacuum out settled algae, and immediately begin preventive algae treatment.

Black Algae Control: Apply 2 2/3 oz. of Aquazine (1.6 ppm simazine) per 10,000 gals. of water when algae growth is first visible. For faster results, remove top of algae growth with wire brush daily and vacuum out settled algae. Seven days later begin preventive algae treatment.

Large Aquariums, Ornamental Fish Ponds, Fountains

Apply 1 1/3 oz. of Aquazine (0.8 ppm simazine) per 10,000 gals. of water. This treatment normally is effective for several weeks depending on conditions causing algae growth. Repeat treatment when algae reappear. For heavy algae growth, it may be necessary to repeat treatment within 6 days.

Precaution: This treatment may injure water hyacinths and water lilies.

Note: Do not treat water intended for domestic use such as for potable water or irrigation.
