DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR WEED CONTROL, CROP INJURY, AND/OR ILLEGAL RESIDUES.

APPLICATION PROCEDURES

Application Timing

Dual 8E alone or in some tank mixtures with other labeled herbicides may be applied for weed control in certain crops at various times. Refer to the given crop section of the label to determine if application timings listed below are recommended.

Preplant Surface Applied: For minimum-tillage or no-tillage systems only, Dual 8E alone and some Dual 8E tank mixtures may be applied up to 45 days before planting certain crops. Use only split applications for treatments made 30-45 days before planting, with 2/3 the recommended broadcast rate for the crop and soil texture applied initially and the remaining 1/3 at planting. Treatments less than 30 days before planting may be made either as a split or a single application. Refer to individual crop to determine if early preplant surface application is recommended. If weeds are present at the time of treatment, apply in a tank mixture combination with a contact herbicide (for example, Gramoxone Extra or Roundup). Observe directions for use, precautions, and restrictions on the label of the contact herbicide. To the extent possible, do not move treated soil out of the row or move untreated soil to the surface during planting, or weed control will be diminished.

Preplant Incorporated: Apply Dual 8E to the soil and incorporate into the top 2 inches of soil within 14 days before planting using a finishing disk, harrow, rolling cultivator, or similar implement capable of providing uniform 2 inch incorporation. Use a preplant incorporated application if furrow irrigation is used or when a period of dry weather after application is expected. If crop will be planted on beds, apply and incorporate metolachlor after bed formation, unless specified otherwise.

Preemergence: Apply Dual 8E during planting (behind the planter) or after planting, but before weeds or crop emerge.

SUNFLOWERS - DUAL 8E ALONE

Preplant Incorporated or Preemergence: Follow instructions for use of Dual 8E alone under **Application Procedures**.

On coarse soils, apply 1.5-2.0 pts./A of Dual 8E if organic matter content is less than 3%, or 2.0 pts./A if organic matter is 3% or greater. On medium soils, apply 2.0-2.5 pts./A of Dual 8E. On fine soils, apply 2.0-2.5 pts./A of Dual 8E if organic matter content is less than 3% or 2.5-3.0 pts./A if organic matter content is 3% or greater.

Precaution: To avoid possible illegal residues, do not graze or feed sunflower forage or fodder to livestock.
