NOTIFICATION
SEP 12 2003

Explanation: Use additional page(s) if necessary. (For Section I and Section II.)

On June 19, 2003 Syngenta submitted a revised label for Award® Fire Ant Bait to the EPA, and the EPA approved the label on August 5, 2003. Following the approval Syngenta discovered that we inadvertently omitted coffee from the list of non-bearing crops on pages 7 and 9 of the label (The EPA approved the addition of coffee to the label for EPA Reg. No. 100-722 on January 22, 1996). Syngenta is submitting a corrected typed label (label code—SCP 722A-L1 or L2 (Notif 9-2-03) and we will submit a final printed label to the EPA as soon as it is available.

This Notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this Notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under Sections 12 and 14 of FIFRA.

Personal Protective Equipment (PPE)

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Engineering Control Statements

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

User Safety Recommendations:

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Environmental Hazards

This product is toxic to fish and aquatic invertebrates. Drift and runoff from treated areas may be hazardous to aquatic invertebrates in adjacent aquatic sites. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment wash water.

ATTENTION

This product contains a chemical (N-methyl pyrrolidone) known to the state of California to cause birth defects or other reproductive harm.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Award must be used only in accordance with recommendations on this label or in separately published Syngenta supplemental labeling recommendations for this product.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- Coveralls
- Waterproof gloves
- Shoes plus socks

7/17

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Do not reenter treated areas until application is complete.

FAILURE TO FOLLOW THE DIRECTIONS FOR USE AND PRECAUTIONS ON THIS LABEL MAY RESULT IN POOR INSECT CONTROL, CROP INJURY, OR ILLEGAL RESIDUES.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Storage

Store away from heat. Keep package dry.

Pesticide Disposal

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal (25 lb. bag)

Completely empty bag into application equipment. Then dispose of bag in a sanitary landfill, or, by other procedures allowed by state and local authorities.

Container Disposal (3 lb. plastic container)

Triple rinse (or equivalent). Then puncture and dispose of in a sanitary landfill, or by other procedures allowed by state and local authorities

For minor spills, leaks, etc., follow all precautions indicated on this label and clean up immediately. Take special care to avoid contamination of equipment and facilities during cleanup and disposal of wastes. In the event of a major spill, fire, or other emergency, call 1-800-888-8372 day or night.

GENERAL INFORMATION

Award Fire Ant Bait is an insect growth regulator with a mode of action specific to insects, and therefore has less influence on non-target organisms. Award Fire Ant Bait is very easy and convenient to apply (see use directions below.)

Precautions: (1) Avoid application during excessively hot periods of the day or when the grass is wet. (2) Heavy rainfall within 2 or 3 hours of application may reduce effectiveness. (3) DO NOT APPLY TO PASTURE, RANGELAND OR OTHER AREAS WHICH MAY BE GRAZED BY CATTLE, SHEEP, OR OTHER DOMESTIC ANIMALS EXCEPT HORSE FARMS. SPECIFIC DIRECTIONS FOR USE ON HORSE FARMS FOLLOW.

APPLICATION SITES

Award Fire Ant Bait may be applied to the following nonbearing crops: apples, avocados, blueberries, carambola, citrus, coffee, guava, lychee, mangoes, mamey sapote, nectarines, peaches, pecans, plums, and West Indian cherry. Nonbearing crops are those that will not bear fruit for at least one year following application of Award Fire Ant Bait.

Award Fire Ant Bait may also be applied to turf and other non-agricultural land including, but not limited to airports, roadsides, school grounds, golf courses, parks, picnic grounds, sports fields, other recreational areas, ornamental gardens, cemeteries, and other landscaped areas.

Award Fire Ant Bait may also be applied to home lawns and landscaped areas around the home.

Award Fire Ant Bait may be applied to non-cropped and non-grazed areas on the farm. Non-cropped and non-grazed areas include areas around barns, outbuildings, fence rows, set aside acres, and other areas not grazed by livestock or used as crop land.

Award Fire Ant Bait may be used on pasture, rangeland, or other grazed areas on horse farms **only** if horses are not used for human consumption.

Award Fire Ant Bait may also be used in and around container and field-grown ornamental and non-bearing nursery stock and on sod farms (commercial turf).

Precautions: 1) Application to nonbearing crops is permitted up to one year before the first harvest. 2) Do not apply to the specified nonbearing crop more than twice per year.

SPECIFIC USE DIRECTIONS

FIRE ANT CONTROL

Award Fire Ant Bait is slow acting but very effective for control of fire ants. Following application, Award Fire Ant Bait is collected by worker ants and distributed throughout the colony. Within 4 - 8 weeks, there is considerable ant mortality and a continual decline of the fire ant colony. Applications made in the fall may take up to 12 weeks before decline of the colony occurs due to cooler weather.

Methods of Application

Apply Award Fire Ant Bait when ants are actively foraging. This is usually when soil temperatures are above 60°F. Avoid application during excessively hot periods of the day or when grass or other vegetation is wet. Heavy rainfall within 2 or 3 hours of application may reduce effectiveness.

In cases where reinfestation occurs or when very large mounds remain active, retreatment may be desirable after 3 - 4 months.

Single Mound Treatment: Apply 1 - 3 level tablespoons of Award Fire Ant Bait per mound, uniformly distributing material 3 - 4 ft. around the mound. Do not contaminate kitchen utensils by use or storage.

Broadcast Application: Apply uniformly with ground equipment calibrated to give the correct dosage. Apply 1 - 1.5 lbs./A.

Aerial Application: Apply uniformly with aerial equipment calibrated to give the correct dosage. Apply 1 - 1.5 lbs./A. Do not apply when weather conditions favor drift from treated areas.

BIG-HEADED ANT (*PHEIDOLE MEGACEPHALA*) CONTROL

Broadcast Application: Apply Award Fire Ant Bait uniformly with ground or hand-held equipment calibrated to deliver the correct dosage. Apply at 1-1.5 lbs./A. Treat surrounding areas, adjacent borders, and fence lines to help prevent ant migration into the treated area. Allow 4 - 6 weeks for the insect growth regulator effect of Award Fire Ant Bait to reduce the activity of the ant colonies.

Re-treat after 4-6 months, if needed.

11/17

Precautions: 1) Do not apply within one year of the first harvest. 2) Do not apply to these non-bearing crops more than twice per year.

**SUBJECT: AWARD® FIRE ANT BAIT
EPA REG. NO. 100-722
NOTIFICATION TO CORRECT LABEL**

Dear Sir or Madam:

On June 19, 2003, Syngenta Crop Protection, Inc. submitted a revised label for Award® Fire Ant Bait, EPA Reg. No. 100-722, and the EPA approved the label on August 5, 2003. Following the approval, Syngenta discovered that we inadvertently omitted the crop, coffee, from the list of labeled non-bearing crops (The EPA approved the addition of coffee to the label for EPA Reg. No. 100-722 on January 22, 1996). We corrected the label by reinserting coffee into the list of non-bearing crops on pages 7 and 9 and we are attaching two copies of the corrected typed label, one with the changes highlighted. The new label code is SCP 722A-L(NOTIF) 9-2-03. We will submit revised final printed labeling to the EPA as soon as it is available.

We apologize for the error. If you have any questions or comments, please contact me. I can be reached at (336) 632-2838.

Sincerely yours,

Carolyn F. Brinkley
Sr. Regulatory Product Manager
