**This labeling must be in the possession of the user at the time of pesticide application.**

SCP 801B-S1A 0202

## DIRECTIONS FOR APPLICATIONS

### Grapes

Use of Ridomil Gold EC will aid in the control of root and crown rots caused by *Phytophthora* spp. when used in conjunction with good cultural practices to minimize disease problems. Ridomil Gold EC will not revitalize plants showing moderate to severe *Phytophthora* root rot symptoms.

Soil spray (broadcast or band): Apply 3.6 pts/A on a broadcast basis or 0.25 pt/1,000 linear ft of row in a 3 foot band at the base of the plant before plants start to grow in the spring. Two additional applications may be made to coincide with periods most favorable for root rot development.

**NOTES:** (1) Do not apply more than 10.8 pt/A per year. (2) For low rainfall or infrequent irrigation areas, an application of Ridomil Gold EC needs to be moved into the root zone by rainfall, irrigation, or mechanical incorporation. (3) Do not apply within 60 days of harvest.

Ridomil Gold® EC is a trademark of Syngenta
