Ms. Carolyn F. Brinkley  
Novartis Crop Protection, Inc.  
P.O. Box 18300  
Greensboro, NC 27419-8300

Dear Ms. Brinkley:

Subject: Barricade® 65WG Herbicide  
EPA Reg. No. 100-834  
Application and Letter Dated May 10, 1999, Request To  
Amend Registration by Adding Supplemental Labeling  
for Weed Control in Overseeded Perennial Ryegrass  
in Arizona, California, Nevada and Texas

The proposed supplemental labeling bearing claims for use of Barricade 65WG Herbicide for the control of Poa annua in perennial ryegrass over-seeded golf courses (excluding golf course putting greens), lawns and sod nurseries has been reviewed as an amendment to the registration of the subject pesticide product under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) as amended. The proposed labeling is an acceptable amendment to the subject pesticide product registration under the Act provided that you:

1. Correct the reference to Barricade 65WG Supplementary to read "Barricade® 65WG Supplemental Label for the States of Texas, Arizona, Nevada and California".
2. The statement "Failure to follow the directions for use and precautions on this label may result in poor insect control, crop injury, or illegal residues." must be restated as follows: ".....may result in poor weed control, turf or crop injury or undesirable environmental effects."

- 3. Submit one (1) copy of your final printed label reflecting the above comments prior to your shipment of the subject pesticide product under this supplemental labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA, section 6(e). Your release for shipment of this product under the subject labeling constitutes acceptance of these conditions.

A stamped copy of the proposed label is enclosed for your records.

Sincerely yours,

Joanne I. Miller  
 Product manager (23)  
 Herbicide Branch

**General Information**

This label is for perennial rye grass only at a minimum seeding rate of 350 pounds per acre. Use this product only in Arizona, California, Nevada and Texas only.

**How Much and When to Apply**

Amount to Apply	When to Apply	Expected Control	Precautions
0.58 to 1.0 lb/A	6 to 8 weeks <b>before</b> rye grass overseeding  <i>second application: 4 to 8 weeks after</i> overseeding or when perennial rye grass roots are in the second inch of soil	1 application for 70% or greater control of <i>Poa Annua</i>  <i>second application for enhanced control</i>	Some seedling mortality and temporary reduction in root growth of new seedlings may occur. To reduce the potential for seedling mortality maintain a moist seedbed with light, frequent irrigation  <b>Note:</b> Make no more than 2 applications per year for this use.
