Syngenta request for extension of Supplemental Label expiration dates

Dear Ms. Eagle:

Syngenta Crop Protection, LLC herein submits a request to extend the expiration dates for three supplemental labels for the above listed products. The original supplemental labels for these products were assigned an 18-month expiration from the date of approval. The table below lists the products, label code, and current expiration date for the supplemental labels.

Product Name	EPA Reg. #	Label Code	Activity Expire Date
Platinum® Insecticide	100-939	SCP 939A-S4 1009	4/05/2011
Actara® Insecticide	100-938	SCP 938A-S4 1009	4/05/2011
Cruiser® 5FS	100-941	SCP 941B-S6 0909	3/22/2011

After the expiration date, these supplemental labels will no longer be available for use. There is still a significant quantity of the end use products in the channels of trade that do not have a Section 3 label version with the new uses covered by these supplemental labels. The section 3 labels for these new products were approved in the states of California and New York in the second half of 2010 and we have not yet had significant production for the new labels.

Syngenta requests that the new expiration dates be for 18 months and be extended from the current expiration date on the stamped supplemental label. This would bring the total time frame to 36 months which is consistent with the agency's current view on supplemental label expiration dates.

Enclosed in support of this submission are the following documents:

- One (1) copy of revised supplemental label for each product with an additional 18 month expiration date.

We trust that you will find this submission in order; however, should there be any questions, please contact me at 336.632.2877 or via e-mail at timothy.wilson@syngenta.com.

Sincerely,

A handwritten signature in black ink that reads "Timothy E. Wilson". The signature is written in a cursive, flowing style.

SUPPLEMENTAL LABEL

Syngenta Crop Protection, Inc.
P.O. Box 18300
Greensboro, NC 27419-8300

**SUPPLEMENTAL LABEL FOR CRUISER® 5FS
Insecticide**

EPA Reg. No. 100-941

**SUPPLEMENTAL LABEL FOR DIRECTIONS FOR USE ON
RICE (DRY-SEEDED ONLY) AND SUGARBEETS**

Active Ingredient:	
Thiamethoxam (CAS No. 153719-23-4)	47.6%
Other Ingredients:	52.4%
Total:	100.0%

Cruiser 5FS contains 5 pounds thiamethoxam per gallon.

KEEP OUT OF REACH OF CHILDREN.

CAUTION

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

SCP 941B-S6A-1 0909

This supplemental label expires on September 22, 2012, and must not be used or distributed after that date.

Before using Cruiser 5FS as permitted according to this supplemental label, read and follow all applicable directions, restrictions, and precautions on the label on or attached to the pesticide product container. This Supplemental Labeling contains revised use instructions and or restrictions that may be different from those that appear on the container label. This Supplemental Labeling must be in the possession of the user at the time of pesticide application. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**ACCEPTED
MAR 22 2011**
Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended, for the
pesticide registered under:

EPA. Reg. No: 100-941

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CROP USE DIRECTIONS

RICE (dry-seeded use only)

To provide early season protection of seedlings against injury by grape colaspis rice water weevil, chinchbugs, and thrips, apply Cruiser 5FS at a rate to achieve 0.03 milligrams thiamethoxam per seed* (each fluid ounce of Cruiser 5FS contains 17.7 grams thiamethoxam).

Cruiser 5FS is not labeled for use in water seeded rice production.
Do not plant or sow Cruiser 5FS treated rice seed by aerial application equipment.
Do not use treated fields for the aquaculture of edible fish and crustacean.

*Not to exceed 120 lb. seed/Acre Seeding Rate.

SUGARBEETS

Cruiser 5FS is a seed treatment insecticide that provides early season protection against injury from sugarbeet root maggot, leaf miners, wireworms, root aphids, white grubs, spring tails, and beet leaf hopper. Cruiser 5FS protects sugarbeets from beet leaf hoppers which may spread curly top virus. Thorough seed coverage will offer the best protection of the seed from insect damage.

Apply Cruiser 5FS at 3.39 to 3.95 fl. oz. (equivalent to 60 to 70 grams a.i. of thiamethoxam respectively) per unit of sugarbeet seed. A unit of sugarbeet seed is 100,000 seeds.

For protection against *Pythium* damping-off or *Rhizoctonia species* seed and seedling diseases in sugarbeets, Cruiser 5FS may be applied with Apron XL[®] and Maxim 4 FS and fungicide seed treatments.

Cruiser 5FS may be applied in conjunction with polymers, pelleting materials and seed coating materials that are approved as food-use inert ingredients by EPA and listed in 40 CFR 180.910-960. These materials must show safety on treated seed. The end product that combines Cruiser 5FS with labeled fungicides must be tested for seed safety without any detrimental effects on seed germination or plant stand establishment. Pre-test the germination of a small sample of seed lot with Cruiser 5FS prior to large scale commercial application.
