OCT 01 2008

Dear Dr. Rezaaiyan:

Subject: Scholar
EPA Registration Number 100-969
Your submission dated June 20, 2007 adding postharvest use on
sweet potatoes
OPPIN Decision Number 380883

The supplemental label referred to above, submitted in connection with registration under section (3) of the Federal Insecticide, Fungicide and Rodenticide Act, as amended is acceptable provided that you make these changes.

Add a Directions for Use heading and the following text immediately before the application rate table:
"It is a violation of Federal law to use this product in a manner inconsistent with its labeling. All applicable directions, restrictions and precautions on all EPA-registered products are to be followed. This label and the Federally registered label must be in the possession of the user at the time of pesticide application."

Change the company address to:
PO Box 18300
Greensboro, NC 27419-8300
and add "Manufactured by" immediately above the company name.

This supplemental label must be incorporated into the main label within 18 months or at the next label printing, whichever comes first.

A stamped copy of the label is enclosed for your records. If you have any questions, please contact Lisa Jones on my team at (703) 308-9424 or jones.lisa@epa.gov.

Sincerely,

Mary L. Waller
Product Manager (21)
Fungicide Branch
Registration Division (7505P)

Enclosure: Stamped supplemental label

Sweet Potatoes

Use Scholar as a post-harvest dip and low volume application for the control of post-harvest rots caused by *Rhizopus stolonifer*.

Post-harvest Dip Applications: Mix 8-16 oz. of Scholar in 100 gals. of water, wax/emulsion, or aqueous dilution of wax/oil emulsion. Dip for approximately 30 seconds and allow the sweet potatoes to drain. Add 4 oz. of Scholar to 100 gals. of treating suspension after 500 bushels are treated. After each 1000 bushels treated, drain and flush the tank. Refill with fresh dip suspension.

Low Volume (Concentrate) Applications: Mix 8 oz. of Scholar in 7-25 gals. of water, wax/emulsion, or aqueous dilution of wax/oil emulsion for the crop being treated. In recirculating systems apply to 200,000 lbs. of sweet potatoes.

Do not make more than one post-harvest application to the sweet potatoes.

NOTE: Ensure the Scholar solution remains in suspension by using agitation. Scholar may be degraded by exposure to direct sunlight. Treated sweet potatoes should not be stored in direct sunlight.
