Application to ornamentals should be started prior to the establishment of high insect pest populations. Make reapplications as necessary to keep pest populations under control, using higher rates as pest pressure increases.

Apply at 7-day intervals if treatment is necessary.

j.

Do not apply more than 0.36 pounds of the active ingredient (57.6 oz. of wettable powder) per acre per year.

Good spray coverage is necessary to provide the most effective level of control. Addition of a spreadersticker at recommended rates may enhance the control of insects on certain species of ornamentals having waxy, hard to wet foliage.

For spot treatments use one (1.2 oz.) SCIMITAR WP Insecticide water soluble pack per 3 to 6 gallons of water.

Consult your state university or local Cooperative Extension Service office for specific pest control application timing in your area.

**NOTE**: While phytotoxicity testing has been carried out on a wide range of ornamental plants under various environmental conditions, and no phytotoxicity has been observed, certain cultivars may be sensitive to the final spray solution.

It is advised to prespray a selection of ornamental plants and observe them for 7 to 10 days prior to treating large areas if local use experience is unavailable.

Scale. Thoroughly cover the plant with SCIMITAR WP Insecticide in Water Soluble Packs spray, including trunks, stems, twigs and foliage for control of scale insects.

**Bagworm.** Apply SCIMITAR WP Insecticide in Water Soluble Packs when bagworm larvae begin to hatch. Spray directly on the larvae. Application is the most effective when the larvae are young.

Application to turf should be started prior to the establishment of high insect pest populations and significant turf damage. Make reapplications as necessary to keep pest populations under control, using higher rates as pest pressure incréases.

Apply at 7-day intervals if treatment is necessary.

}

Do not apply more than 0.36 pounds of active ingredient (57.6 oz. of wettable powder) per acre per year.

For spot treatments use one (1.2 oz.) SCIMITAR WP Insecticide water soluble pack per 3 to 6 gallons of water.

Do not apply when turfgrass are waterlogged or when soils are saturated with water (i.e. will not accept irrigation).

Keep children and pets off treated areas until spray has dried following the application.

Surface Insect Control (armyworm, cutworms, fleas, etc.) For best results apply SCIMITAR WP Insecticide in Water Soluble Packs at recommended rates in 2 to 5 gallons of water per 1,000 sq. ft. The use of a spreader-sticker may be useful if high rainfall amounts are forecast, otherwise the addition of adjuvants is not necessary under normal conditions for surface insect control in turf. Delay watering or mowing for 12 to 24 hours for optimum control of surface-feeding insect pests.

Thatch Inhabiting Insect Control (chinch bugs, billbugs, etc.) For best results apply SCIMITAR WP Insecticide in Water Soluble Packs at recommended rates in 2 to 10 gallons of water per 1,000 sq. ft. The use of a non-ionic wetting agent, penetrant or similar adjuvant is recommended at label rates. Lightly irrigate after application with up to ½ inch of water to move the SCIMITAR WP Insecticide in Water Soluble Packs into the thatch layer. If irrigation is not available, then use high water application rates for optimum results.

Subsurface Insect Control (mole crickets, grubs, etc.) For best results apply SCIMITAR WP Insecticide in Water Soluble Packs at recommended rates in 4 to 10 gallons of water per 1,000 sq. ft. The use of a non-ionic wetting agent, penetrant or similar adjuvant is strongly recommended following label rates. Use the highest water application rates possible with your sprayer. Apply SCIMITAR WP Insecticide in Water Soluble Packs to turf wet with dew, rain or irrigation. Water-in immediately after application with ¼ to ½ inch of water for optimum results.

**Fire Ant Control** Treat individual mounds with a drench application using a watering can. Use one (1.2 oz.) SCIMITAR WP Insecticide water soluble pack per 6 gallons of water. Thoroughly soak each mound and a 3 foot diameter circle around each mound. Gently apply the mixture to avoid disturbing the mound. Disturbing the mound may cause the ants to migrate and reduce the effectiveness of the treatment. For best results, apply in early morning or late evening hours. Make additional treatments as needed.

**Mosquito Control** Apply as a general spray around landscape plantings, turf, and building foundations to control mosquitoes. For best results apply SCIMITAR WP Insecticide in Water Soluble Packs at the recommended rates in 2 to 5 gallons of water per 1,000 sq. ft.
