EPA Form 8570-1 (Rev. 8-94) Previous editions are obsolete.

Please note that in accordance with the provisions of the transfer letter dated February 23, 2001 transferring Zeneca Ag Products registrations to Syngenta Crop Protection, Inc., the enclosed supplemental label is submitted as a Zeneca label for the following reasons.

- The original acceptance letter dated November 21, 2000 for Touchdown Herbicide was a Zeneca name.
- Registration of the Syngenta Touchdown Herbicide label has not yet occurred in the states and production
 of this product has not yet occurred. As Syngenta has 18 months (August 23, 2002) to use Zeneca
 packaging, we have elected to keep this product under the Zeneca name for now.
- A Syngenta label (typed copy) has been submitted by notification for Touchdown Herbicide. Final printed labeling for the Syngenta label will be filed with the Agency when production occurs.

PRODUCT INFORMATION

ZENECA

410 Swing Road Greensboro, NC 27409

SUPPLEMENTAL LABEL FOR TOUCHDOWN® HERBICIDE FOR AERIAL APPLICATION IN FRESNO COUNTY, CALIFORNIA ONLY

FROM FEBRUARY 15 THROUGH MARCH 31 ONLY

EPA Reg. No. 10182-449

NOTIFICATION

AUG 2 3 2001

KEEP OUT OF REACH OF CHILDREN.

CAUTION

All applicable directions, restrictions and precautions on the EPAregistered label are to be followed.

This labeling must be in the possession of the user at the time of pesticide application.

SCP 10182-449-S2 0801

DIRECTIONS FOR USE

It is a violation of federal law to use this product in any manner inconsistent with its labeling.

This label must be in the possession of the user at the time of the application.

AVOID CONTACT OF HERBICIDE WITH FOLIAGE, GREEN STEMS, EXPOSED NON-WOODY ROOTS OR FRUIT OF CROPS, DESIRABLE PLANTS AND TREES, BECAUSE SEVERE INJURY OR DESTRUCTION MAY RESULT.

See "GENERAL INFORMATION" and "DIRECTIONS FOR USE" sections of the label booklet for Touchdown herbicide for essential product information.

APPLICABLE AREA

This supplement only applies to the area contained inside the following boundaries within Fresno County, California.

North: Fresno County line South: Fresno County line East: State Highway 99 West: Fresno County line

GENERAL INFORMATION

Always read and follow the label directions and precautionary statements for all products used in the aerial application. Observe the following directions to minimize off-site movement during aerial application of this product. Minimization of off-site movement is the responsibility of the grower, Pest Control Advisor and aerial applicator.

Written Recommendations

A written recommendation MUST be submitted by or on behalf of the applicator to the Fresno County Agricultural Commissioner 24 hours prior to the application. This written recommendation MUST state the proximity of surrounding crops, and that conditions of each manufacturer's product label and this label have been satisfied.

AERIAL APPLICATOR TRAINING AND EQUIPMENT

Aerial application of this product is limited to pilots who have successfully completed a Fresno County Agricultural Commissioner and California Department of Pesticide Regulation approved training program for aerial application of herbicides. All aircraft must be inspected, critiqued in flight and certified at a Fresno County Agricultural Commissioner approved fly-in. Test and calibrate spray equipment at intervals sufficient to insure that proper rates of herbicides and adjuvants are being applied during commercial use. Applicator must document such calibrations and testing. Demonstration of performance at Fresno County Agricultural Commissioner approved fly-ins constitutes such documentation, or other written records showing calculations and measurements of flight and spray parameters acceptable to the Fresno County Agricultural Commissioner.

Applications at Night — Do not apply this product by air earlier than 30 minutes prior to sunrise and/or later than 30 minutes after sunset without prior permission from the Fresno County Agricultural Commissioner.

Note: For aerial application from April 1 through February 14, refer to the "FOR AERIAL APPLICATION IN CALIFORNIA ONLY" supplemental label.

Read the "Conditions of Sale and Limitation of Warranty and Liability" in the label booklet for Touchdown herbicide before using this product. These terms apply to this supplemental labeling, and if these terms are not acceptable, return the product unopened at once.

PRODUCT INFORMATION

ZENECA

410 Swing Road Greensboro, NC 27409

SUPPLEMENTAL LABEL FOR TOUCHDOWN® HERBICIDE FOR AERIAL APPLICATION IN CALIFORNIA ONLY

EPA Reg. No. 10182-449

KEEP OUT OF REACH OF CHILDREN.

CAUTION

All applicable directions, restrictions and precautions on the EPAregistered label are to be followed.

This labeling must be in the possession of the user at the time of pesticide application.

SCP 10182-449-S1 0801

DIRECTIONS FOR USE

It is a violation of federal law to use this product in any manner inconsistent with its labeling.

This label must be in the possession of the user at the time of herbicide application.

See "GENERAL INFORMATION" and "DIRECTIONS FOR USE" sections of the label booklet for essential product information.

See the "CROPS" section of the label booklet for specific recommendations on the use of this product.

EXTREME CARE MUST BE EXERCISED TO AVOID CONTACT OF THE SPRAY WITH FOLIAGE, GREEN STEMS, OR FRUIT OF DESIRABLE CROPS (EXCEPT AS SPECIFIED FOR INDIVIDUAL GLYPHOSATE TOLERANT CROPS), PLANTS, TREES OR OTHER DESIRABLE VEGETATION, SINCE SEVERE DAMAGE OR DESTRUCTION MAY RESULT.

Aerial applications of this product are allowed in the following situations:

- 1. In fallow and reduced tillage systems prior to the emergence or transplanting of labeled crops.
- 2. In alfalfa and pasture renovation applications.
- Over-the-top applications in glyphosate tolerant corn and glyphosate tolerant cotton (including Roundup Ready® corn and cotton). Refer to the Touchdown Herbicide label for specific application instructions for over-the-top applications in these glyphosate tolerant crops.
- 4. Preharvest in alfalfa, corn, cotton, wheat, glyphosate tolerant corn and glyphosate tolerant cotton. Refer to the Touchdown Herbicide booklet for glyphosate tolerant corn and glyphosate tolerant cotton for specific preharvest application instructions for each individual crop.

Do not plant subsequent crops other than those listed in the label booklet for 30 days following application.

When applied as recommended under the conditions described, this product controls annual and perennial weeds listed in the label booklet.

When tank mixing this product with 2,4-D for aerial applications, only 2,4-D amine formulations may be used. This tank mixture may be used for fallow and reduced tillage systems and alfalfa and pasture renovation applications only.

DO NOT EXCEED A MAXIMUM RATE OF 52 FLUID OUNCES PER ACRE OF THIS PRODUCT WHEN MAKING APPLICATIONS BY AIR IN FALLOW AND REDUCED TILLAGE SYSTEMS AND ALFALFA AND PASTURE RENOVATION APPLICATIONS. THIS RESTRICTION ALSO APPLIES TO PREHARVEST COTTON AND PREHARVEST TO GLYPHOSATE TOLERANT COTTON APPLICATIONS.

DO NOT EXCEED A MAXIMUM RATE OF 26 FLUID OUNCES PER ACRE OF THIS PRODUCT WHEN MAKING APPLICATIONS BY AIR IN ALFALFA, CORN, WHEAT AND GLYPHOSATE TOLERANT CORN PRIOR TO HARVEST. THIS RESTRICTION ALSO APPLIES TO OVER-THE-TOP APPLICATIONS IN GLYPHOSATE TOLERANT CORN AND GLYPHOSATE TOLERANT COTTON.

Aerial Equipment

Use the recommended rates of this product in 3 to 15 gallons of water per acre. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash waters.

AVOID DRIFT – DO NOT APPLY WHEN WINDS ARE GUSTY OR UNDER ANY OTHER CONDITION WHICH FAVORS DRIFT. DRIFT MAY CAUSE DAMAGE TO ANY VEGETATION CONTACTED TO WHICH TREATMENT IS NOT INTENDED. TO PREVENT INJURY TO ADJACENT DESIRABLE VEGETATION, APPROPRIATE BUFFER ZONES MUST BE MAINTAINED.

Use the following guidelines when aerial applications are made near crops or desirable perennial vegetation after bud break and before total leaf drop, and/or near other desirable vegetation or annual crops.

- 1. Do not apply within 100 feet of all desirable vegetation or crop(s).
- 2. If wind up to 5 miles per hour is blowing toward desirable vegetation or crop(s), do not apply within 500 feet of the desirable vegetation or crop(s).
- 3. Winds blowing from 5 to 10 miles per hour toward desirable vegetation or crop(s) may require buffer zones in excess of 500 feet.

4. Do not apply when winds are in excess of 10 miles per hour or when inversion conditions exist.

Coarse sprays are less likely to drift; therefore, do not use nozzles or nozzle configurations which dispense spray as fine spray droplets. Do not angle nozzles forward into the air-stream and do not increase spray volume by increasing nozzle pressure. Drift control additives may be used. When a drift control additive is used, read and carefully observe the cautionary statements and all other information appearing on the additive label.

Ensure uniform application – To avoid streaking, uneven, or overlapped application, use appropriate marking devices. Thoroughly wash aircraft, especially landing gear, after each day of spraying to remove residues of this product accumulated during spraying or from spills. PROLONGED EXPOSURE OF THIS PRODUCT TO UNCOATED STEEL SURFACES MAY RESULT IN CORROSION AND POSSIBLE FAILURE OF THE PART. LANDING GEAR IS MOST SUSCEPTIBLE. The maintenance of an organic coating (paint) which meets aerospace specification MIL-C-38413 may prevent corrosion.

Read the "Conditions of Sale and Limitation of Warranty and Liability" in the label for Touchdown herbicide before using this product. Those terms apply to this supplemental labeling and if those terms are not acceptable, return the product unopened at once.
