Paper Products:

TecTo-Shield MP 100 is applied efficiently via the size tub or water trough. First adjust the pH of the tub-size or water-trough solutions to below 4.0, then add TecTo-Shield MP 100 with thorough agitation. Apply at dosage levels from 0.005% to 0.125% based on the finished paper weight. For use in a coating color, product should be added with agitation to the makeup water. Do not use for paper products intended for use in contact with food.

Air Filters (heating & cooling filters and/or room air cleaners/purifiers):

TecTo-Shield MP 100 will protect against mold and mildew when incorporated directly into the hot melt, or when added with moderate agitation to the latex binder before spraying onto the web. Dosage concentrations range from 0.1 to 0.5% based on finished weight of the formulations.

Plastics (vinyl chloride, urethane, polypropylene, polyethylene, nylon):

Add TecTo-Shield MP 100 to the master batch after melting pellets. Add from 0.1 to 0.3% by weight of the finished formulation. Allow time for uniform mixing before injection. Do not use where the treated plastic comes into contact with food packaging materials or on food contact surfaces.

Canvas Textiles (Not for apparel):

Prepare a trough with water at pH 3-4, and then add TecTo-Shield MP 100 MP to obtain the desired concentration. Pass the fabric through the solution until the proper amount of solution is absorbed. A wetting agent may be used to aid the solution in penetrating the fabric.

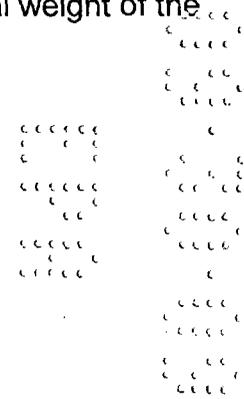

Apply TecTo-Shield MP 100 at dosage levels from 0.05% to 0.3% based on finished fabric weight. Determine proper dosage by laboratory and/or field testing.

If deposition of TecTo-Shield MP 100 onto the canvas is desired, wash treated material with a 1% soda ash solution. This can be followed by normal processing steps.

Product should be used for manufacture of canvas textiles only, such as tents and awnings.

Carpeting (For Carpet Backing Only):

Use conventional methods such as spin finish or melt blending. Apply 0.05% (spin finish) to 0.5% (melt blending) of TecTo-Shield MP 100 based on total weight of the material being treated.
