The action of CDQ is due to a combination of quaternary ammonium disinfectant, a cleaner and synergizing builders.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

BRULIN'S CDQ is a concentrate and must be diluted before use. For normal cleaning and disinfecting, use 2 to 4 ounces per gallon of water. Floors must be mopped with this solution, using only clean mops. Other hard surfaces: wipe with clean rags, or use hand scrub brush. Wear rubber or plastic gloves while hand scrubbing and rinsing.

- Use at 4 oz. per gallon to kill *Pseudomonas aeruginosa*.
- Use at 2 oz. per gallon to kill *Staphylococcus aureus* and *Salmonella choleraesuis*.

Treated surfaces must remain wet for 10 minutes.

Rinsability, moderate foam height and synergized cleaning make CDQ effective on sealed hard non-porous surfaces including composite, terrazzo and marble floors; glass and metal equipment, and painted and varnished surfaces; vinyl and leather upholstery. Removes heavy soils and even strips wax from floors.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.
