

ROACH & ANT KILLER is a highly effective new formulation which provides rapid kill of such crawling insects as listed below, including those resistant to certain chlorinated hydrocarbon and phosphate insecticides:

Ants	Crickets	Roaches	Sowbugs
Brown dog ticks	Earwigs	Silverfish	Spiders

In addition to rapid initial kill, **ROACH & ANT KILLER** stays on treated surfaces and kills insects many weeks after the spray deposit has dried.

HOW TO USE: Unlike most pressurized residual sprays, **ROACH & ANT KILLER** emits a pencil stream spray allowing the user to direct the spray to a distance of 6 feet. Cracks, crevices, and hard-to-reach locations can be reached without bending, crawling, or climbing. Spray infested surfaces until wet, moving the spray stream rapidly to prevent excessive wetting of surfaces, and waste of material. Point spray away from people, plants and pets.

RESTRICTIONS: Do not apply to rugs, carpets, draperies, wall paper, or similar materials that may be stained. Avoid excessive wetting of plastic, rubber and asphalt surfaces such as tiles and floor coverings.

FLAMMABLE: Do not spray into or near open flame. Do not smoke while using. Keep container away from stoves, radiators, or other surfaces. Do not place in direct sunlight. Temperatures exceeding 120°F. may cause the container to burst. Do not puncture or throw container into fire.

DIRECTIONS FOR USE

ANTS, COCKROACHES, CRICKETS, SILVERFISH, SPIDERS, WATERBUGS: Spray into cracks, crevices, around baseboards, and other places where these insects hide. Apply behind and beneath cabinets, refrigerators, sinks, stoves, and in and around waste containers. Spray ant trails and places where ants enter premises. Repeat as needed.

BROWN DOG TICKS: Spray sleeping quarters of pets, around baseboards, window and door frames, wall cracks, and local areas of floors. Repeat as needed. Fresh bedding should be placed in animal quarters after spraying. Do not spray animals.

ANTS, CRICKETS, EARWIGS, SOWBUGS, and BROWN DOG TICKS — OUTDOORS: Spray infested areas thoroughly including outside surfaces of screens, doors, window frames, foundations, patios, or other places where insects may enter. For ants, spray hills and runways. Repeat as necessary. Do not spray vegetation.

WARNING

May be harmful if swallowed, inhaled, or absorbed through the skin. Avoid breathing of spray mist and provide adequate ventilation of area being treated. Contact with skin, eyes, or clothing should also be avoided. Do not allow children to contact treated surface until surfaces are completely dry. Wash thoroughly with soap and warm water after handling. Avoid contamination of food, utensils, and food preparation areas. Remove pets and cover aquaria in areas to be treated. If poisoning occurs, obtain prompt medical aid. To Physician—Atropine sulfate is antidotal.

NOTICE

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.
