

**DIRECTIONS—Continued**

trench and to each 6 inch layer of soil as it is returned to the trench. For application to trenches over 15 inches deep, the dosage should be 1 gallon per 1 linear foot of trench. To facilitate application each gallon of Penta MR may be diluted with 2 to 3 gallons of kerosene or fuel oil. Do not use within 10 feet of shrubs or ornamentals.

**WEED KILLING.** As an effective general contact herbicide to be used over waste areas, around buildings, along paths and roadways and in similar places, to kill most grasses and broad leaved weeds, apply full strength as a spray to thoroughly wet vegetation to be killed. Re-treat surviving weeds. Avoid spray drift to desirable plants.

**WARNING**

Do not get on skin or on clothing. In case of contact with the skin, wash with soap and warm water. Prevent contact of this liquid with the eyes. Immediately wash with water. Call a physician. Do not breathe vapor or fumes of spray mist. Harmful if inhaled or swallowed or absorbed through skin! Do not pour, store or apply near fire or flames. Do not use on wood that will come into contact with desirable plants or for soil poisoning within 10 feet of shrubs or ornamentals. Will cause skin irritation.

Misuse as to quantity, timing or method of application can cause damages or injury to animals, persons, property or crops.

This product is toxic to fish and wildlife. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on the label.

**NOTICE**

Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

**Treated Surfaces May Be Painted — Meets Specifications of Western Pine Association**

**DIRECTIONS**

**BEFORE USE READ CAUTION AND NOTICE STATEMENTS CAREFULLY**

Penta MR is especially designed for treating wooden objects for protection against insects and decay. Penta MR is also an excellent soil poison for termites and a general contact weed killer.

**WOOD TREATMENTS:** Fence posts, pickets and rails should be free of bark, dry and well seasoned and be dipped in this product for 12 to 48 hours for efficient control of wood destroying pests. To treat doors, window sash, framing, porch floors and general repairs, apply by brushing, spraying or dipping. Dipping time should be from 3 to 30 minutes depending upon the type of wood treated and how fast it will absorb the Penta MR. Two coats should be used when applying by brush or spray. Use full strength.

preferred, as better coverage and penetration is obtained. To paint treated surfaces, allow time for solvent to evaporate. This may require one or more days depending upon temperature and air circulation around treated material.

When treating wood for termite control, treatment should be made after all cuts are made and before use in the structure.

**SOIL TREATMENTS:** As an effective soil poison for termite control, trench around foundations, pillars and other areas to be protected to a depth of 2 1/2 feet. Do not dig trench below top of footing. Apply 2 1/2 gallons Penta MR to each 5 linear feet of trench, making application to bottom of
