

## SUGGESTED USE

BIOTROL 2.5 Dust is a biological insecticide preparation suitable for use in conventional dust application equipment as an aid in control of leaf chewing larvae (caterpillars) of certain Lepidopterous species (butterflies and moths) frequently found to be pests on crop plants.

## DIRECTIONS FOR USE

BIOTROL 2.5 Dust is recommended for use by ground equipment or by air.

Apply when pests are first noticed and repeat as necessary. Thorough plant coverage is necessary for optimum control.

**Broccoli, Cabbage, Cauliflower, Kale, Collards, Mustard Greens, and Turnip Greens, Celery, Cotton, Letuce, Potatoes, Melons:** For the control of Imported Cabbageworm apply 30 to 50 lbs. per acre and Cabbage Looper apply 30 to 50 lbs. per acre

**Artichoke:** For the control of Artichoke Plume Moth apply 30 to 50 lbs. per acre.

**Tobacco:** For the control of Tobacco Hornworm apply 20 to 40 lbs. per acre.

**For use on Alfalfa in the West Coast States and Arizona:** For the control of Alfalfa Caterpillar use 20 to 40 lbs. per acre.

**Grapes:** For the control of Grape Leaf Folder use 20 to 40 lbs. per acre.

## CAUTION

Reasonable care should be taken to avoid inhalation or contact with open wounds.

Do not apply to food or feed crops under conditions resulting in excessive residue at harvest.

Do not reuse container. Destroy when empty
