TERMITOX

TERMITE CONTROL

DIRECTIONS FOR USE

TERMITE CONTROL - Remove all soil from around building. When depth of soil is less than 6 inches, dig a trench a minimum of 6 inches deep and one foot wide and fill with material.

Using a conventional garden watering can, dilute the Chlor-dane Emulsifiable Concentrate with water. Apply this material evenly in the trench, using the entire 2 1/2 gallons of material. Tamp well and fill trench thoroughly about six inches of dirt with the material.

For buildings lacking enough clearance for trenching, it is suggested that a soil probe be used in order that the tunnels built by the termites can be located. When located, destroy them with a trowel, dig a small trench on both sides of the tunnel location about six inches deep and pour the same mentioned diluted material. Trenching on the outside of the foliage is recommended as a measure to prevent infestation.

HOUSEHOLD APPLICATIONS — PLANTERS 75% CHLORDANE EMULSIFIABLE CONCENTRATE can be diluted as directed in instructions on right hand panel, and sprayed as a coarse spray or brushed on cracks or other areas such as window sills, floor molding, water pipes, and other natural habitats and hiding places of the insect pests. In interior situations this product will give residual control to the treated premises against re-infestation. Surfaces exposed to weathering or washings should be treated periodically as needed.

PLANTERS 75% CHLORDANE EMULSIFIABLE CONCENTRATE contains 75% Chlor-dane (1,1-dichloro-2,2-bis(4-chlorophenyl)ethane) and 25% related compounds.

T-H

Add 1 1/2 tablespoons of PLANTERS 75% CHLORDANE EMULSIFIABLE to one quart of water, stir and apply as follows:

TO CONTROL ROACHES OR WATERBUGS: Thoroughly treat infested cracks and other hiding places. Apply locally on exposed surfaces where roaches will crawl when they come out of hiding. Repeat treatment when necessary.

TO CONTROL ANTS: Thoroughly treat ant trails and areas around door sills and window frames where the pests may enter the premises. It is frequently desirable to treat the openings around water pipes, heat ducts, electrical outlets and baseboards where ants may come out into rooms from wall spaces and partitions. Repeat treatments as often as necessary to maintain effective control.

TO CONTROL SPIDERS: Apply as wet spray along infested baseboards and corners. In basements, treat pipes, storage localities, and other areas infested. Repeat treatment where necessary.

WARNING

Harmful if swallowed. Contact with skin can cause toxic symptoms. Avoid breathing spray mist. In case of contact with skin, wash with soap and water. Avoid contamination of feed and foodstuffs.

Do not use in commercial food preparation areas or in edible products areas of food processing plants.

This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Keep out of any body of water. Do not apply when weather conditions favor drift from areas treated. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the
