

For maximum control, BIOTROL XK must be ingested; therefore, good coverage of both sides of the leaves is necessary for good control. BIOTROL XL is exempt from tolerance requirements on registered crops and may be applied at any time. Low rate should be used except under heavy infestations, when larvae are larger or when foliage is very heavy. BIOTROL XK is recommended for use in suitable quantities of water for complete coverage of all foliage, 5-10 gallons of spray per acre by air or 20-100 gallons of spray per acre by ground equipment, depending on the type of application equipment and growth stage of the crop. Low or high gallonage sprayers may be used. Place required amount of BIOTROL XK in 1/2 sprayer tank of water with agitator running, then finish filling to proper level.

CROP	PEST	LBS. PER ACRE
Broccoli, Cabbage, Cauliflower	Cabbage Looper	1 to 3
Kale Mustard Greens, Turnip Greens	Imported Cabbage Worm	1/2 to 1
Beans, Collards, Cucumbers, (South-eastern U. S.), Lettuce, Melons, Potatoes, Spinach	Cabbage Looper	1 to 3
Soybeans	Soybean or Cabbage Looper	1 to 3
Alfalfa, (Calif., Ariz., N. M.)	Alfalfa Caterpillar	1 to 3
Celery	Celery or Cabbage Looper	1 to 3
Grapes	Grape Leaf Folder	1 to 2
Tomatoes	Cabbage Looper, Tomato or Tobacco Hornworm	1 to 3 1/2 to 1 1/2
Tobacco	Budworm Cabbage Looper Hornworm	1 to 2 1 to 3 1/2 to 1 1/2
Shade, Ornamental and Forest Trees, (ground equipment)		lbs. 100 gal. (hydraulic sprayer*)
	Gypsy Moth**	1 to 3
	Bag Worm	1 to 3
	Elm Spanworm	2 to 3
	Spring and Fall Cankerworm	1 to 3
	Fall Webworm	1 to 3
	Red-Humped Catterpillar***	1 to 3

*For mist blowers, mix the applicable amount (lbs.) per 10 gallon of water.
**For best control of Gypsy Moth, apply BIOTROL XK when young larvae (second or third instar) are present. Repeat treatment if necessary.
***California only.
