NOTIFICATION

JUN 22 2011

Subject: Notification adding stink bugs
EPA Registration Number: 149-15
Decision: 450098

Dear Ms. Griffin:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration (PRN)98-10 dated May 20, 2011, for the abovementioned product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the actions requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions regarding this letter, please contact Samantha Hulkower at (703) 603-0683.

Sincerely,

A handwritten signature in black ink, appearing to read "Mark Suarez".

Re: Label Notification to Add a Pest per PR Notice 98-10, Section II B

Product: Terro® Carpenter Ant and Termite Killer
EPA Reg. No. 149-15
Company: Senoret Chemical Company, Inc.

Dear Mr. Suarez:

On behalf of Senoret Chemical Company, Inc., I am submitting a notification per PR Notice 98-10, to add a pest, stink bugs, to the label of Terro® Carpenter Ant and Termite Killer, EPA Reg. No. 149-15. This pest addition meets all the notification requirements specified in Section II B, Adding or Deleting Pests, of PR Notice 98-10.

This notification also includes several Optional User Instructions such as "See reverse side for directions", which rephrase current wording on the label and do not change how the product is used. In addition, California requested that an additional reference to the three asterisks (after the product name) appear on the front panel. This reference uses wording from the label and directs the user to the back panel.

Please note that on March 1, 2010 and April 13, 2010 submissions were made on this product in response to EPA's June 4, 2009 letter to Pyrethroid registrants. Although we have made several inquiries, to date we have not received an approval. Therefore, the enclosed label does not include any of the revisions from those submissions.

This notification is time sensitive so it is important that the 30 day review process is maintained. We would like to work with the Agency on addressing the outstanding submissions either within the 30 day timeframe or following acceptance of this notification.

Enclosures:

- EPA form 8570-1
- 2 copies of revised label (one copy with changes highlighted)

If you have any questions regarding this submission, please contact me at cgriffin@delta-ac.com or (301) 680-7971.

Sincerely,

Cristina Griffin, Agent
Senoret Chemical Company, Inc.

TERRO® CARPENTER ANT AND TERMITE KILLER***

NOTIFICATION

JUN 22 2011

- Contains Synergized Permethrin and Tetramethrin
- Provides Quick Killing Action and Residual Control
- Use Indoors and Outdoors
- Use Indoors
- Use Outdoors
- Kills Fire Ants
- Kills Fleas - Roaches - Ants
- Kills Fleas
- Kills Roaches
- Kills Ants
- Kills on Contact - Kills Fast
- Kills Hidden Bugs
- Kills Bugs You See and Even the Ones You Don't
- A broad spectrum insecticide highly effective against Ants, Bees, Carpenter Ants, Carpet Beetles, Centipedes, Cockroaches, Crickets, Earwigs, Firebrats, Fleas, Flour Beetles, Grain Beetles, Ground Beetles, Millipedes, Mole Crickets, Moths, Pillbugs, Silverfish, Sowbugs, Spiders, Stink Bugs, Termites, Ticks and many other similar crawling insects.
- Water-Based Formula
- Non-Staining
- No Oily Residues
- No Unpleasant Odor
- Protects for up to 4 weeks
- Also kills Carpenter Bees, Woods Wasps, Beetles and Borers
- [Also] kills Stink Bugs
- Shake Well Before Using

ACTIVE INGREDIENTS:

Tetramethrin.....	0.20 %
Permethrin*.....	0.50 %
Piperonyl Butoxide**	1.00 %
OTHER INGREDIENTS:	<u>98.30 %</u>
TOTAL	100.00 %

*Cis/trans ratio: min. 35% (+/-) cis and max. 65% (+/-) trans.

**Equivalent to min. 0.8% (butylcarbityl)(6-propylpiperonyl) ether and 0.2% related compounds.

***Kills worker or winged forms of termites. See [back][side] panel for additional information.

PRECAUCION AL USARIO: Si usted no lee ingles, no use este producto hasta que la etiqueta le haya sido explicada amplimente.

(TO THE USER: If you cannot read English, do not use this product until the label has been fully explained to you.)

PRECAUTIONARY STATEMENTS Hazard to Humans & Domestic Animals

CAUTION: Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

FIRST AID	
If on skin or clothing:	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
HOT LINE NUMBER	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.	

Environmental Hazards

This product is toxic to fish and other aquatic organisms. Do not apply directly to water.

Physical and Chemical Hazards

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130° F may cause bursting. Do not use this product in or on electrical equipment due to the possibility of shock hazard. Do not use on surfaces that can be harmed or stained by water.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION: Terro® Carpenter Ant and Termite Killer [This product] provides effective control of pests in and on buildings and structures and their immediate surroundings and on modes of transport. Permitted areas of use include, but are not limited to: apartment buildings, homes, hotels, hospitals, nursing homes, schools, industrial buildings, laboratories, mausoleums, private residences, utilities, and in non-food/feed areas of food/feed handling establishments, and on: vessels, rail cars, buses, trucks and trailers.

Do not use in food/feed areas of food/feed handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms but excluding areas where foods may be prepared or held.

In the home, cover all food handling surfaces and cover or remove all food and cooking utensils or wash thoroughly after treatment. Terro® Carpenter Ant and Termite Killer [This product] may be used as a crack and crevice treatment or as a spot application in non-food/feed areas. All areas where insects hide or through which insects may enter should be treated.

For use in non-food areas such as garbage rooms, lavatories, floor drains (to sewers), entries and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

Hospital and/or nursing home patients must be removed from their rooms while treatment is being applied and must not be allowed to return until all treated surfaces have dried. School classrooms must be treated only when students are not present, and all treated surfaces must be dry before the students are allowed to return.

Remove pets and cover fish aquaria before spraying. Prevent re-entry of dogs and cats into treated area until spray deposits are dry.

SURFACE SPRAY APPLICATION: Hold container upright with nozzle away from you. Press valve down and spray as directed. Spray surface until slightly wet (at a rate of 4 ounces product to treat approximately 25 square feet of surface area).

CRACK & CREVICE INJECTION: Hold container upright and tilt extension tube to a 90° angle with can and inject into cracks and crevices where insects may be hiding, living and breeding. Place injection tip 1/2 inch into cracks, crevices, holes and other small openings where insects may be a problem. Release a one-second spray per spot. In serious infestations, if possible, place spots approximately 12 inches apart. In light infestations or for preventative treatment, place spots approximately three feet apart. In long running cracks, move the injector tip along the crack while spraying. Move at the rate of one linear foot per second in heavy infestations and three feet per second in light infestations. See the additional directions below for effective control of specified insects.

[To kill] Cockroaches (including adult and immature stages of both non-resistant and organophosphate and carbamate resistant strains), **Ants, Booklice, Boxelder Bugs, Crickets, Dermestids, Firebrats, Fleas, Silverfish, Stink Bugs, Ticks and Sowbugs:** Apply as a spot or crack and crevice treatment. Apply thoroughly to all areas where these pests crawl and hide, especially in cracks and crevices, and hidden surfaces around sinks and storage areas, behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, the underside of shelves, drawers, bookcases and in similar areas.

Ants: Spray freely around ant trails, doors and windows and other places where ants enter premises, around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray freely on and around debris.

Carpenter Ants: For effective control, locate and treat nests and surrounding areas. Apply around doors and windows and other places where ants enter premises and where they crawl and hide. Inject into wall voids and infested wood through existing openings or newly drilled small holes.

Brown Dog Ticks and Fleas IN BUILDINGS: Apply to infested areas such as pet beds and resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture and other areas where these pests may be present. Remove old bedding of pets and replace with clean fresh bedding after treatment of pet areas. Do not apply directly on animals.

Spiders: Apply along and behind baseboards, to window and door frames, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl.

Centipedes, Earwigs, Ground Beetles, Millipedes, Mole Crickets, Pillbugs, Sowbugs, and Ticks: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.

PANTRY PESTS - Grain Beetles (Rusty, Merchant and Saw-toothed), Flour Beetles (Red and Confused), Chocolate Moths, Cigarette Beetles, Clover Mites, Cluster Flies, Drugstore Beetles, Elmleaf Beetles, Rice Weevils, Lesser Grain Borers, Spider Beetles and Tobacco Moths: Treat exposed stages. Remove all foodstuffs, utensils and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry prior to replacement of food and utensils.

Carpet Beetles (Black, Furniture and Varied): Spray on and under edges of floor coverings, under rugs and furniture and in closets or other localities where these insects are found.

Webbing Clothes Moths: Use this product as a crack and crevice treatment in closets and other storage areas where these pests are found. This is an adjunct treatment and will not control moth larvae already on clothes. Do not apply to clothing.

PESTS ON OUTSIDE SURFACES OF BUILDINGS: For control of building infestation due to *Ants, Clover Mites, Crickets, Earwigs, Millipedes, Stink Bugs and Sowbugs (Pillbugs)*. Spray foundation of building where insects are active and may find entrance up to a height of 2 to 3 feet. Apply as a residual spray to outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages and refuse dumps.

Fire Ants: To treat mounds, use soil injector. To maximize spray distribution, insert injector into the mound full length if possible. Inject the mound at 3-6 sites at a rate of 5-10 seconds spray per site. For very large mounds (over 36 inches in diameter), increase the number of injection sites. Space injection sites in a circular pattern on the mound surface with one site in the center. To quiet active ants on mound surface, sweep surface with spray from a distance of 18 inches. For best results, apply in cool weather or in early morning or late evening hours. Treat new mounds as they appear.

Localized Treatment of Wood-Infesting Insects: Beetles and Borers (such as the following families: *Anobilidae, Bostrichidae, Buprestidae, Cerambycidae, Lyctidae, Oedemeridae, Sestidae*), **Carpenter Bees, Termites** and **Wood Wasps:** Locate area of infestation and/or insect tunnels and cavities. Using a crack & crevice tip, spray into tunnels, galleries and inaccessible closed voids. In infested areas, small holes should be drilled eight to ten inches apart to insure thorough insecticide gallery treatment. Be sure not to contact electrical wiring or plumbing when treating. For *Carpenter Bees*, seal the entrance holes with small pieces of stainless steel wool after application.

*****Termites, Carpenter Ants and Carpenter Bees:** For termites, the purpose of such applications is to kill workers or winged forms which may be present in the treated areas at the time of application. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but are merely a supplement. Not recommended as sole protection against termites. For active infestations, get a professional inspection.

[OPTIONAL USER INSTRUCTIONS]

[See reverse side for directions]

[Read full label before applying.]

[Follow Crack & Crevice Injection directions on can.]

[Use of this product is subject to the use precautions and limitations imposed by the label affixed to the can.]

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage: Do not store near heat or open flame. Store in cool dry area away from children.

Pesticide Disposal and Container Handling: Do not puncture or incinerate! **If empty:** Offer for recycling if available or place in trash. **If partly filled:** Call your local solid waste agency for disposal instructions.

[Master label note, not part of labeling: Product must bear a batch code; may be placed anywhere on label or container.]

IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container at once.

By using this product, user or buyer accepts the following conditions, disclaimer of warranties and limitations of liability.

CONDITIONS: The directions for use of this product are believed to be adequate and should be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Senoret Chemical Company, Inc.
