Subject: Labeling Notification per Pesticide Registration Notice (PRN) 98-10 - Addition of Optional Graphics
Product Name: TERRO MSLAB
Admin Number: 149-22
EPA Receipt Date: 02/21/2025
Action Case Number: 00645518

Dear Georgia Anastasiou:

The U.S. Environmental Protection Agency is in receipt of your application for notification under Pesticide Registration Notice 98-10 for the above referenced product. The EPA has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The labeling submitted with this application has been stamped "Notification" and will be placed in our records.

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains statements or claims substantially differing from statements or claims made in connection with obtaining a FIFRA section 3 registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

If you have questions, please contact Christopher Taylor via email at taylor.christopher.m@epa.gov.

Sincerely,

CHRISTOPHER TAYLOR

Christopher Taylor, Risk Manager, IVB 2, RD
Office of Pesticide Programs

03/11/2025

ACTIVE INGREDIENT:

Sodium Tetraborate Decahydrate (Borax)5.40%

OTHER INGREDIENTS:94.60%

TOTAL.....100.00%

KEEP OUT OF REACH OF CHILDREN

CAUTION

NET CONTENTS:

[__ Bait Stations __ fl. oz. (__ ml) each]

* except fire ants, pharaoh ants, carpenter ants, and harvester ants

[MASTER LABEL - BACK PANEL PAGE 1 OF 2]

[PRODUCT INFORMATION: TERRO® MSLAB is [a] [an] [ready] [easy]-to-use, pre-filled, liquid ant bait station. Ants (except fire ants, pharaoh ants, carpenter ants, and harvester ants) will enter the station, feed and return to the nest where they will pass on the bait to the rest of the colony. Included [removable] adhesive [strips] [tape] allow(s) for [discreet], multi-surface application. Bait stations may be applied to indoor vertical surfaces, [[including cabinet sides and interiors, cabinet toe kicks, baseboards, walls] cabinet overhangs or placed directly on floors or counters.]

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

FOR USE IN: Homes, Hospitals, Restaurants, Apartments, Grocery Stores, Institutional Buildings, Schools, Cafeterias, Warehouses, Storage Areas, Food Processing Plants, Mobile Homes, Boats, Military Bases, Theaters, Nursing Homes, and on Military, Commercial, and Cruise Ships.

ATTRACTS AND KILLS ALL COMMON HOUSEHOLD ANTS INCLUDING: Argentine ants, Ghost ants, Cornfield ants, Pavement ants, Acrobat ants, White footed ants, Little black ants, Odorous house ants, Crazy ants, Big headed ants, and other sweet-eating ants (except fire ants, pharaoh ants, carpenter ants, and harvester ants).

USE INSTRUCTIONS:

{Note to reviewer: Instructions will be listed in appropriate sequential order based on whether adhesive strips are pre-applied or applied by consumer}

Product Application:

1. For [adhesive] [discreet] [placement] [applications], apply [remove] [included] [removable] adhesive [strip] [tape] [liner] [paper backing] [to either side of station between adhesive [strip] [tape] placement guides [with (labeled) (printed) (removable) (removable labeled) (wall) side of adhesive facing out]. [Press and hold [adhesive] [strip] [tape] firmly to station for 10 seconds [to ensure proper adhesion].] [For non-adhesive application, skip to step [2] 3.]

[Note: Only (side) (printed) (labeled) (side of adhesive) (as removable) (side of adhesive) (strip) (tape) is removable.]
2. [Remove [remaining] [labeled] [printed] [removable side] [wall side] [adhesive] strip [liner] [paper backing].]
3. Hold bait station firmly in one hand with bait pack tab facing up. [Break][Twist][Snap][Cut] off the bait pack tab being careful not to spill bait.
4. Apply/place bait stations close to where ants are [traveling] [present]. For adhesive [applications] [placements], [carefully] press and hold station firmly against surface for 10 seconds [to ensure proper adhesion]. Ants will enter the bait station through the hole created by removing the bait pack tab.
5. Place additional bait stations anywhere ants [may enter] [are present in] your home. [For best results, use (all) (number) bait stations to ensure sufficient supply for the ants.]
6. Monitor [placements] [bait stations] regularly for activity but do not interfere with the ants or baits.
7. Replace bait stations [with new baits] when bait is depleted [until ants are controlled].
8. [Once ants are controlled, replace bait stations every month to keep ants from returning].

Product Removal (for adhesive applications):

1. Grasp bait station and [twist] [turn] [gently] [slowly] to remove [station] from adhesive [strip] [tape] [application surface] [being careful not to spill any remaining bait.]
2. [Pull [free] [loose] adhesive strip tab [in direction of tab] [to stretch strip] until strip is freed from [application] surface.]

[MASTER LABEL – BACK PANEL PAGE 2 OF 2]

CONTROLLING AND ELIMINATING ANTS (except fire ants, pharaoh ants, carpenter ants, and harvester ants): Ants may first come in large numbers but will soon disappear. This product is specifically formulated to allow worker ants to consume the product and survive long enough to carry the liquid back to the [nest and deliver a dose to the] rest of the colony. The key to obtaining effective control is to monitor the placements regularly and ensure there is always a fresh supply of bait at each placement. Complete control may take up to two weeks.

DO NOT use adhesive application [strips] [tape] on delicate surfaces such as unpainted walls, wallpaper or wood furniture finishes. Do not use insect killing sprays on or near bait stations as they may repel ants from feeding. Do not use bait stations in edible product areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed. Do not use bait stations in serving areas while food is exposed. Do not contaminate feed and foodstuffs. Place bait stations in areas inaccessible to children and pets.

For further information on successful ant control using the TERRO® brand of ant control products, visit our web site (www.Terro.com).

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in a cool dry place. Do not store where children or animals may gain access.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Nonrefillable Container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
