Calibrate the sprayer by determining the number of strokes it takes a hand sprayer to fill a 2 fluid ounce can. The correct dosage per animal.

IMPORTANT: Wash the sprayer with water thoroughly after each spraying as fogger tends to set up in the small passages of the sprayer and it will not work well the next day. Use left over spray for travel and breeding areas that are in the farm area.

NOTICE: Because we cannot control the application of this product by the user, the seller can assume no responsibility other than the value of this container and its contents.

SANITATION: ANDERSON'S 18 1/2% DDVP CONCENTRATE will be more effective when breeding and travel areas like manure piles, garbage disposals, etc. are removed and destroyed.

DANGER: If Swallowed, Induced or Absorbed: Treat as Poison. If in contact with eyes, flush with water. If on skin, wash with soap and water. If in contact with clothing, remove clothing and wash with water. If in contact with eyes, flush with water. If in contact with skin, wash with soap and water. If in contact with clothing, remove clothing and wash with water. If in contact with eyes, flush with water. If in contact with skin, wash with soap and water. If in contact with clothing, remove clothing and wash with water.
