DIRECTIONS

IN BARN: Close all doors and windows prior to milking. Suspend spray mist in the air so it settles gradually to the floor. Keep closed for 10 to 20 minutes. Sweep up and destroy fallen insects. Repeat as necessary for control of flies, mosquitoes and gnats. Apply at rate of 1 pint per 8,000 cubic feet.

HORN FLIES, STABLE FLIES, MOSQUITOES AND GNATS: For dairy and beef cattle, horses and hogs, use a good hand machine sprayer or fogger and apply as a mist. We recommend 1 or 2 ounces of FLYGA KVIST to each animal. Spray before milking or pasturing for protection from horn flies, house flies, stable flies, mosquitoes and gnats. Particular attention should be taken to cover the animal's entire body especially the legs, shoulders and belly. Avoid wetting the hides of the animals and around the eyes, nose and mouth. Do not apply within one week of slaughter. Do not exceed 2 ounces daily per animal. Care should be taken that the spray does not come in direct contact with the lactating dairy cow's teats unless they are washed and dried before milking. Such application may seriously degrade the quality of the milk.

IN BARN FOGGER: To kill horn flies, stable flies, barn flies, mosquitoes and gnats, apply at the rate of 1 pint per 8,000 cubic feet. Before spraying reduce air movement by closing doors, windows and other openings. Do not fog where animals have received direct applications of DDVP within 8 hours.

PIGS, KENNELS AND HORSE BARN: Spray FLYGA KVIST on pigs to protect them from house flies, stable flies, gnats, and mosquitoes. Spray once or twice daily as needed. Spray adult hogs lightly so as to moisten the hair tips. Do not exceed 1 ounce daily per adult hog or .5 ounce for younger animals. Use mist spray only on horses to protect against horn flies, stable flies, barn flies, mosquitoes and gnats and do not exceed 2 fluid oz. per animal at each application. Apply at rate of 1 quart per 1,000 square feet of surface area to outside dog runways, window sills and ledges of dog kennels to protect against horn flies, stable flies, mosquitoes and gnats. Apply at rate of 1/2 pints per 1,000 square feet of surface area in horse barns for control of flies. Spray floors, walls and cracks where infestations may occur.

SANITATION: FLYGA KVIST will be more effective when breeding and travel areas like manure piles, garbage disposals, etc. are removed and destroyed.

WARNING: Harmful or Fatal if swallowed, inhaled or absorbed through the skin. Do not breathe spray mist. Do not get in eyes or on clothing. In case of contact, wash immediately with soap and water. Wash all contaminated clothing with soap and hot water before reuse. Wear protective clothing. If swallowed, induce vomiting immediately and get medical attention. Do not contaminate water, feed, milk or milking equipment. Do not store in temperatures over 130 degrees F. Keep well corked when not in use. Do not apply regularly to calves under 6 months of age. Brahman cattle should not be treated as they may show hypersensitivity to organic phosphates. Atropine is antidotal. 2-PAM is also antidotal and may be administered in conjunction with atropine.

DO NOT USE, POUR, SPILL OR STORE NEAR HEAT OR OPEN FLAME.

EMPTY CONTAINER: Do not reuse empty container. Wash thoroughly with water and detergent. Discard in a safe place.

This product is toxic to fish, wildlife and birds. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes.
