DIRECTIONS

HOUSE FLIES, MOSQUITOES AND GNATS

Use a good hand, machine sprayer or fogger. Apply 1 pint of **ANDERSON'S FOOD PLANT SPRAY** to 8,000 cubic feet. Spray after working hours for protection from house flies, mosquitoes and gnats.

Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation.

PREPARATION FOR SPRAYING

Close all doors and windows prior to spraying. Suspend spray mist in the air so it settles gradually to the floor. Keep closed for 10 to 20 minutes. Sweep up and destroy fallen insects. Repeat as necessary for control of flies, mosquitoes and gnats. Apply at rate of 1 pint per 8,000 cubic feet.

FOGGER IN PLANT

To kill house flies, mosquitoes and gnats, apply at the rate of not more than 1 pint per 8,000 cubic feet. Before spraying reduce air movement by closing doors, windows and other openings. Do not fog when product is exposed. Do not remain in treated areas. Ventilate the area after treatment is completed.
