An-Care ALGAEICIDE

FOR CONTROL OF ALGAE IN THE SWIMMING POOL

ACTIVE INGREDIENT:

Poly [oxyethylene (dimethyliminio) ethylene—
(dimethyliminio) ethylene dichloride]

10.0%

INERT INGREDIENTS:

90.0%

100%

CAUTION:

KEEP OUT OF REACH OF CHILDREN
See Side Panel for Other Cautions

AN-CARE ALGAEICIDE is used to control the growth of algae in swimming pools. For maximum effectiveness pools containing heavy growth of algae should be cleaned prior to using AN-CARE ALGAEICIDE.

APPLICATION

1. For pools having just visible algae growth add an initial dose of 75 to 115 fl. oz. of **AN-CARE ALGAEICIDE** per 10,000 gallons of water and remove settled algae debris by cleaning.
2. For treatment of a freshly cleaned and filled pool, add initially 41 to 75 fl. oz. of **AN-CARE ALGAEICIDE** per 10,000 gallons of water.
3. To maintain pools free of visible algae growth, subsequent additions of 13.5 to 27 fl. oz. of **AN-CARE ALGAEICIDE** per 10,000 gallons of water should be made every 5 to 7 days after the initial treatment.
4. Uniform distribution of **AN-CARE ALGAEICIDE** throughout the water in the pool is necessary for maximum effectiveness. **AN-CARE ALGAEICIDE** is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. **AN-CARE ALGAEICIDE** can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix **AN-CARE ALGAEICIDE** with concentrated dry or liquid chlorine products.

CAUTION: Harmful if swallowed. Do not get in eyes. Avoid contact with skin. In case of contact flush with plenty of water for at least 15 minutes. If eye irritation persists get medical attention. Avoid contamination of food.
"Do not reuse empty drum. Return 30 or 50 gallon drums to reconditioner or destroy by perforating or crushing and burying in a safe place away from water supplies. Rinse smaller container thoroughly with water and destroy by perforating or crushing and burying in a safe place away from water supplies."
This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water. Apply this product only as specified on this label.
