

MORCRO EPTAM (R) 2.3 GRANULAR

MORCRO

EPTAM (R) 2.3 GRANULAR

FOR WEED CONTROL IN FLOWERS AND ORNAMENTALS

THE CONTENTS OF THIS CAN WILL TREAT 200 SQUARE FEET (10' x 20')

CONTROLS

BERMUDA, NUTCRASS & QUACK GRASS

CAUTION: KEEP OUT OF THE REACH OF CHILDREN
SEE LEFT PANEL FOR OTHER CAUTIONS.

ACTIVE INGREDIENT:

S-ethyl dibromothiocarbamate..... 2.3%

INERT INGREDIENT..... 97.7%

TOTAL.....100.0%

(R) Reg. TM of Stauffer Chemical Company
U.S. Patent No. 2,913,317

U. S. P. A. Reg. -158-X

Ground Cover

Ajuga	Aspidistra	Chimaphila
Gazania	Epipactis	Scilla
Hypericum	Phlox	Sedum spp., ornamental

Evergreen & Deciduous Trees and Shrubs

Berberis	Bougainvillea	Camellia	Podocarpus
Boraginaceae	Fir	Chamaecyparis	Rhododendron
Camellia	Redcedar	Citrus	Rose
Chamaecyparis	Holly (European)	Citrus (Japanese)	Spruce
Citrus	Juniper	Citrus	Tiburnum
Dogwood	Leucothoe	Pinus	Yew (Taxus)

EPTAM controls over 20 species of weeds and grasses in treated areas. Partially weed-free for an average of 12 weeks (in better soil areas, more than one application may be needed).

Annual weed controlled include the following:

Annual Weeds	Annual Grasses
Common Ragwort	Common Broomrape
Crabgrass	Florida Panicum
Florida Panicum	Goosegrass
Goosegrass	Ground Squirrel
Ground Squirrel	Japanese Knotweed
Japanese Knotweed	Red Top
Red Top	St. Augustine
St. Augustine	St. John's Wort
St. John's Wort	St. Paul
St. Paul	St. Paul
St. Paul	St. Paul

FOR CONTROL OF NUTCRASS, BERMUDA, QUACK GRASS, AND OTHER ESTABLISHED TALLS AND SHRUBS. Existing stands of these weeds should be pulled or felled out before EPTAM is applied.

Shake content of this can into a 1/2 inch hole (1/2 inch dia.) into the soil to a depth of 2-3 inches and water immediately.

CAUTION: Harmful to wildlife. Wash thoroughly after use. Avoid contact with skin, eyes, nose, mouth, and clothing.

PRECAUTIONS

EPTAM should be used only for the purposes and at the concentration rates (do not exceed). EPTAM may cause injury to plants under certain soil and climatic conditions, or if directions are not followed.

WARRANTY: Manufacturer's liability is not made for any injury or damage caused by the use of this product under conditions of application not specifically recommended in the directions.

A special label should be used for the container of this product. The label should read: "EPTAM is a selective herbicide for use on trees, shrubs, ground covers and flowers."

Do not use EPTAM on flowers and ornamentals.

Read All Directions Before Using

DIRECTIONS FOR USE

Eptam can be used any time during the growing season to prevent weeds from growing in and around flowers, trees, shrubs and ground covers. Any weeds that are growing in the area to be treated should be removed before EPTAM is applied. EPTAM WILL NOT KILL WEEDS THAT ARE ALREADY GROWING.

Apply EPTAM by gently shaking the container over the area to be treated, holding the container about 3 feet above the soil. After application, there should be approximately 40 particles of EPTAM per square inch of soil.

For best results, EPTAM should be applied to the soil surface. Do not apply EPTAM to the foliage of plants. EPTAM is a selective herbicide and will not kill the plants to which it is applied. EPTAM will kill weeds that are growing in and around the plants to which it is applied. EPTAM will not kill weeds that are already growing in the area to which it is applied.

HOW TO USE EPTAM

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.

Apply EPTAM to the soil surface in and around the plants to which it is applied. Do not apply EPTAM to the foliage of plants.
