DIRECTIONS FOR USE

FOR BEST RESULTS cut lawn close. Remove clippings and water before treatment to bring chinch bugs to surface.

Treat entire lawn evenly and thoroughly at rate of four-pounds per 1000 sq. ft. area. Apply with a spreader for uniform coverage.

Work material into grass with a coarse water spray after treatment. Formula aids in the control of fall armyworms, sod webworms, lawn moths, ants and millipedes.

Be sure foliage of grass is dry before application. Water normally after treatment. Keep children and animals off treated areas until material is washed into soil and grass is thoroughly dry.
