

BO-RID 25H

SEMI SOIL STERILANT

EPA Reg. No. 179-30

ACCEPTED

JUL 16 1973

UNDER THE FEDERAL PESTICIDE
FUNGICIDE AND ROBOTICIDE ACT
FOR ECONOMIC PEST CONTROL
ED UNDER NO. 179-30 SUBJECT
TO ATTACHED COMMENTS.

BO-RID 25H	
ACTIVE INGREDIENTS	
Bromacil (5-bromo-3-sec-butyl 6-methyluracil)	10%
INERT INGREDIENTS	90%
Total	100%

GENERAL INFORMATION

BO-RID 25H Semi-Soil Sterilant, when used at rates of 200 lbs. per acre, is an effective general herbicide for the control of most annual and perennial grasses and weeds in non-cropland areas where bare ground is desired.

BO-RID 25H Semi-Soil Sterilant may be used at any time of year for general vegetation control, providing adequate moisture is moved to the root zone by rainfall or irrigation.

Best results are obtained if BO-RID 25H Semi-Soil Sterilant can be applied pre-emergence (before growth starts). The degree of control and duration of effect will vary with the amount of chemical applied, soil type, rainfall and other conditions.

BO-RID 25H Semi-Soil Sterilant is formulated for dry application in power and hand operated spreading equipment. Effects of applications are usually slow to appear and may not become evident until the herbicide has been carried to the root zone by moisture. Because the effectiveness of BO-RID 25H Semi-Soil Sterilant varies with environmental conditions and species of vegetation, user should consult experiment stations or extension service weed specialists for suggestions for use under local conditions.

CAUTION: KEEP OUT OF REACH OF CHILDREN. See back of bag for additional cautions.
