EXCELLENT DEODORANT

NET CONTENTS 5 LBS.

### CAUTION

KEEP OUT OF REACH OF CHILDREN

**THE R. H. BOGLE COMPANY**  
MANUFACTURING CHEMISTS  
ALEXANDRIA, VA.

### DIRECTIONS

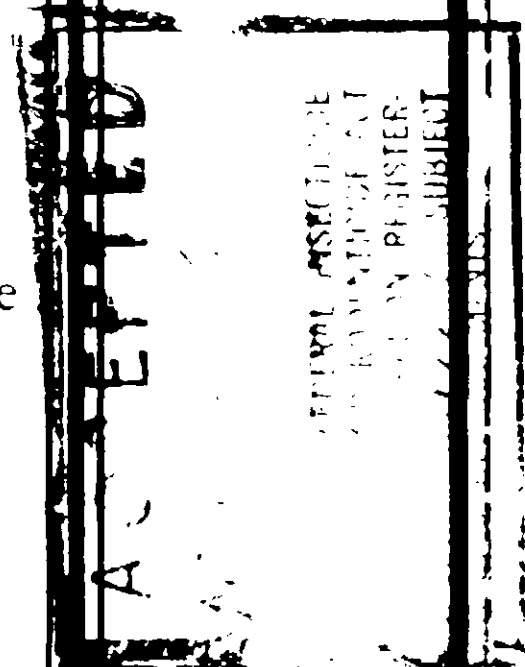

PARABO CRYSTALS should be used generously in the folds of blankets, draperies and garments to be stored away in tight containers. It is important that storage containers be made as tight as possible to assure continued protection.

PARABO CRYSTALS should be spread generously on rugs before rolling them up in tough paper for storing. Paper used should be heavy enough to confine the gas formed from PARABO CRYSTALS. Rugs should be wrapped and sealed tightly.

PARABO CRYSTALS gradually evaporate forming a gas which penetrates into every crevice of an enclosed container and into the fibres of the fabrics, killing the moth eggs and larvae.

Articles stored away with PARABO CRYSTALS will lose all odor soon after being taken out and aired.

Keep can closed tightly when not in use to prevent loss by evaporation.

## FOR CLOSETS & WARDROBES

Make bags, using any available piece of porous fabric. Fill bags with PARABO CRYSTALS, allowing for tying the tops and leaving a loop for hanging on hook in closets and wardrobes. Equally satisfactory results may be obtained by sprinkling PARABO CRYSTALS freely on floors and shelves. For complete protection keep closets and wardrobes tightly closed at all times and for at least seven days after PARABO is added. If closet is opened, add more chemical and keep closed for specified period.

## DOSAGE

Use one pound of PARABO CRYSTALS to every 100 cubic feet of confined space.

## AS A DEODORANT

PARABO CRYSTALS, in any kind of perforated container, offer an effective deodorant for use in bathrooms, etc.

---

PARABO CRYSTALS will not stain or harm any kind of fabric.
