

BO-RID B-1

BROMACIL WEED KILLER

USDA Reg. No. 179-52

WATER SOLUBLE LIQUID
1 Gallon Contains 1 Pound Bromacil

ACTIVE INGREDIENT:

Lithium salt of bromacil (5-bromo-3-sec-butyl-6-methyluracil) 10.6%

INERT INGREDIENTS 89.4%

Keep out of reach of children.

WARNING! HARMFUL OR FATAL IF SWALLOWED.

CAUSES EYE IRRITATION. MAY IRRITATE NOSE, THROAT, AND SKIN.

Do not get in eyes. Avoid contacts with skin and clothing.

Avoid breathing spray mist. Wash thoroughly after handling.

In case of contact, flush eyes or skin with plenty of water; for eyes, get medical attention.

IMPORTANT—Injury to or loss of desirable trees or other plants may result from failure to observe the following: Do not apply, or drain or flush equipment on or near desirable trees or other plants or on areas where their roots may extend, or in locations where the chemical may be washed or moved into contact with their roots. Do not use on lawns, walks, driveways, tennis courts, or similar areas. Prevent drift of spray to desirable plants. Do not contaminate irrigation or domestic waters. Keep away from contact with fertilizers, insecticides, fungicides and seeds. Thoroughly clean all traces of Bo-Rid B-1 from application equipment immediately after use. Flush tank, pump, hoses, and boom with several changes of water after removing nozzle tips and screens (clean these parts separately).

Do not re-use container; crush and bury when empty.

KEEP CONTAINER CLOSED WHEN NOT IN USE.

THE R. H. BOGLE CO.

ALEXANDRIA, VA. 22313

CAUTION! COMBUSTIBLE MIXTURE

Keep away from heat and open flame.

GENERAL INFORMATION

Bo-Rid B-1 Bromacil Weed Killer is a water soluble liquid to be mixed in water and applied as a spray on non-cropland areas. It is an effective general herbicide for control of many annual and perennial weeds, and is particularly useful for control of perennial grasses. Effects are slow to appear and may not become apparent until the chemical has been carried into the root zone of the weeds by moisture. The degree of control and duration of effect will vary with the amount of chemical applied, soil type, rainfall, and other conditions.

Bo-Rid B-1, after mixing in water, is non-volatile, non-flammable, and non-corrosive to metals except aluminum. Do not use with aluminum spray nozzles.

DIRECTIONS

Apply Bo-Rid B-1 just before or during the period of active growth of weeds. If dense growth is present, results will be improved if vegetation is removed before treatment. Do not apply when ground is frozen.

Before spraying, calibrate equipment to determine quantity of water necessary to uniformly cover measured area to be treated. Measure the proper amount of Bo-Rid B-1 and mix into the necessary volume of water. After Bo-Rid B-1 has been thoroughly mixed in the spray tank, agitation of the spray solution is not required.

Use a fixed-boom power sprayer properly calibrated to a constant speed and rate of delivery. For application with a hand-gun sprayer, use at least 200 gals. spray per acre. For treating small areas, a tank-type hand sprayer or sprinkling can may be used.

WEED CONTROL

To control most weeds for an extended period of time on non-cropland areas such as RAILROAD, HIGHWAY and PIPELINE RIGHT OF WAYS, PETROLEUM TANK FARMS, LUMBERYARDS, STORAGE AREAS, and INDUSTRIAL PLANT SITES.

Apply 3 to 6 gals. Bo-Rid B-1 per acre to control ANNUAL WEEDS and GRASSES such as foxtail, ryegrass, wild oats, crabgrass, cheatgrass, bromegrass, ragweed, lambsquarters, puncturevine, orchardgrass and turkey mullein. When applied just prior to or after emergence of annuals, rates as low as 1½ gal. per acre control many annual weeds and grasses in low rainfall areas and give short term control in higher rainfall areas.

Apply 6 to 12 gals. Bo-Rid B-1 per acre to control PERENNIAL WEEDS and GRASSES such as smooth brome, Bahiagrass, bluegrass, redtop, purpletop, quackgrass, broomsedge, aster, dandelion, dog fennel, goldenrod, plantain and wild carrot. In areas with low or seasonal rainfall, rates as low as 4.5 gals. per acre control many perennial weeds and grasses.

Apply 12 to 24 gals. Bo-Rid B-1 per acre to control JOHNSONGRASS, use at the same rate for OTHER HARD-TO-KILL PERENNIAL WEEDS and GRASSES such as Bermuda grass, Dallisgrass, nutsedge, Vaseygrass, saltgrass, bouncingbet, dogbane, bracken fern and horsetail. Where limited rainfall (usually less than 4 inches) occurs during the active growth period, such as some areas of the West, Bo-Rid B-1 will not provide satisfactory control of hard-to-kill, deep-rooted perennial weeds such as Johnsongrass.

Use the higher levels of the dosage ranges on absorptive soils (usually those high in organic matter or carbon).

Retreatment—Apply 1.5 to 6 gals. Bo-Rid B-1 per acre when annual weeds and grasses reappear on sites where weed growth has been controlled.

For Small Areas—5 oz. of Bo-Rid B-1 per 250 sq. ft. is approximately 8 gals. per acre.

NOTICE TO BUYER

Seller warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. This warranty does not extend to use of this product contrary to label use directions, or under abnormal use conditions, or under conditions not reasonably foreseeable to seller; buyer assumes all risk of any such use. Seller makes no other warranties, express or implied.

ACCEPTED

JUN 1 1975

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 179-52
