CAUTION

[illegible] type of [illegible] spraying [illegible] gallons or [illegible] forestry purposes. [illegible] spraying or [illegible] method of application can cause [illegible] deaths, personal property or crops.

[illegible] circumstances should this herbicide product or any 2,4-D or 2,4,5-T weed killers be used in the vicinity of cotton, tomatoes, garden crops, grapes, ornamentals, or other susceptible crops, as severe damage may result. Extreme care must be exercised to prevent drifting of this material. Do not apply on windy days. (Coarse sprays are less likely to drift.)

Although this product has been formulated with low volatile esters in order to reduce the hazard of vapor damage, every precaution must be exercised to prevent injury to susceptible plants in the vicinity. Vapors from this product at high temperatures may cause injury to susceptible plants growing in the immediate vicinity. Drift may cause injury to susceptible plants adjacent to the area of application.

Do not [illegible] equipment used in applying BO-RID BKE 4 to apply insecticides, fungicides or other material to susceptible crops. Do not [illegible]

Do not [illegible] pasture, [illegible] range, or food stuffs. Avoid [illegible] grass and hay crops, damage or destroy cover [illegible]

[illegible]

Do not [illegible] manufacturer should not be held responsible [illegible]

[illegible] days after [illegible] treated area [illegible]

Effective 36, 1972.

DIRECTIONS

BEFORE USE READ DIRECTIONS, CAUTION AND NOTICE STATEMENTS CAREFULLY

MIXING INSTRUCTIONS

Add the recommended amount of BO-RID BKE 4 brush killer to about one-half the volume of water or oil to be used in spraying. Mix well, then add the remaining water or oil and mix until spray mixture is uniform. Continue mixing while spraying. Do not let water get into brush killer oil sprays used in stump or basal treatment.

BO-RID BKE 4 can be mixed with water or dissolved in oil. BO-RID BKE 4 is designed for weeds and woody growth which are controlled better by 2,4,5-T than 2,4-D. Brambles, blackberries, some hawthorns, osage orange, poison ivy, ground cherries and horse nettles are typical of the vegetation which can be controlled along fence rows, right-of-ways, highways, in pastures and on rangelands and beneath power [illegible]

WOODY PLANTS AND BRUSH IN PASTURE AND RANGELANDS AND NON-CROP LAND SUCH AS FENCE ROWS, RIGHT-OF-WAYS

Type of Spraying	Amount of Bo-Rid BKE-6 To Use	When To Apply	How To Apply
FOLIAGE TREATMENT	3 quarts in 100 [illegible] gallons of water [illegible] (6 tablespoons [illegible] in 3 gallons of water)		[illegible] and sprayer
FRILL TREATMENT (For large trees)	[illegible]		
STUMP TREATMENT	[illegible]		
BASAL BARK TREATMENT	[illegible]		

1 quart contains 1 lb. 2,4,5 T Acid

[illegible] Such as fuel oil No. [illegible] No. [illegible] recommended in such cases.
