

CAUTION After application, do not spray deer or approved area of 2-3 pds of Bo-Rid BKE-6 mixed with a gallon of diesel fuel and sufficient water to make 3 to 5 gallons of solution applied per acre. Apply when foliage is fully expanded and dry. Control of mesquites, mesquite stands may be controlled by foliar treatment by hand spraying and 1 quart of Bo-Rid BKE-6 to 100 gallons of diesel oil.

For prickly pear control use 1 pint of Bo-Rid BKE-6 in 1 gallon of diesel oil or kerosene during hot summer period. Apply evenly to both sides of pads (beavertail end to point) and fronds.

If stored below freezing temperatures, it may be necessary to warm to 40°F and agitate thoroughly before using.

CAUTION

BO-RID K.O. WILL CAUSE CONTACT WITH SKIN, EYES OR BREATHING TRACT DAMAGE. DO NOT DRINK WATER USED FOR SPRAYING. DO NOT INHALE SPRAY DUST. DO NOT EAT FOODS PREPARED IN CONTAMINATED WATER. DO NOT SWIM IN TREATED WATER. DO NOT USE IN GARDENS OR AGRICULTURAL AREAS. DO NOT USE ON PLANTS. DO NOT DAMAGE FOLIAGE. EXPOSED SKIN MUST BE WASHED TO PREVENT IRITATION. DO NOT APPLY TO WOODY PLANTS. DO NOT SPRAY ON COLD DAYS.

ACTIVE INGREDIENTS: 2,4,5-T VOLATILE ESTER. 2,4,5-T is a potent herbicide which is highly toxic to plants. It is a colorless liquid with a sharp, pungent odor. It is soluble in water and organic solvents. It is used as a defoliant and desiccant in agriculture and as a herbicide in forestry, rangelands, and non-crop areas. It is also used as a fungicide and insecticide. It is a strong irritant to skin and eyes. It is a known carcinogen and has been linked to several types of cancer in humans. It is a persistent pollutant and can contaminate groundwater and surface water. It is a major environmental concern due to its persistence and bioaccumulation.
