

DIRECTIONS FOR USE. Shake well before using. Unless otherwise noted on this label use the following dilution:

1 teaspoon for 1 quart spray
4 teaspoons for 1 gallon spray

ANTS: Spray diluted Dexol Chlordane 45% Spray around foundations, door frames, porches, patios, window sills of houses and around garbage containers. Spray infested ornamentals and flowers and surrounding soil. Spray known trails and surrounding areas. Saturate the nest openings. Keep children and pets away until the surfaces are all dry.

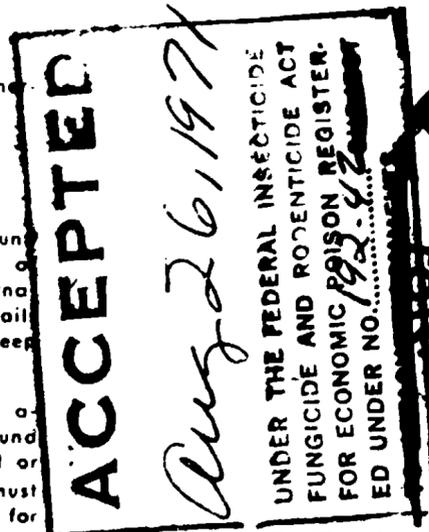

GRASSHOPPERS, EARWIGS, CRICKETS: Thoroughly spray around ornamentals along edges of fields as a barrier around fences where insects may appear. DO NOT apply to feed or foodstuffs. Any forage crops treated with this material must not be fed to dairy animals or to animals being finished for slaughter.

LAWN MOTH, WHITE GRUB, JAPANESE BEETLE LARVAE and CUTWORMS in Lawns: Water lawn thoroughly and then spray entire surface at the rate of one diluted gallon to each 150 sq. ft. (10' x 15'). Do not water lawn again for two or three days; then assume normal program.

CAUTION. Keep children and pets off treated areas until dry.

CAUTION: This product is toxic to fish and wildlife. Birds feeding on treated areas may be killed. Keep out of any body of water. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment, or disposal of washes. Apply this product only as specified on this label."

USDA Reg. No. 192-42

CHLORDANE

45% SPRAY

**KILLS ANTS, GRASSHOPPERS, EARWIGS,
TERMITES, CRICKETS, LAWN MOTHS,
CUTWORMS & CERTAIN OTHER PESTS.**

TERMITES: For fast initial kill and extended protection against reinfestation of subterranean termites, use 7 to 10 Oz. Dexol Chlordane 45% to each 5 gallons of water or 4 to 6 quarts per 100 gallons. This water emulsion will not damage nearby shrubbery. If trenching is required, dig 1 to 2 1/2 feet beneath the soil, exposing the foundation but not below the footing and apply the diluted solution at the rate of 2 gallons per linear feet where the foundation is shallow and 4 gallons per linear feet if trench is over 15" deep. This rate of application includes the treatment of the backfill. Deep foundations should be trenched to the full 30" depth. For spraying of the entire area under the house or other structure, use one gallon of the above solution to each 10 square feet of area to be treated. Make yearly inspections and repeat when necessary.

CAUTION: This material containing technical chlordane is toxic and may be absorbed through the skin when in solution. Avoid inhaling mist from spray. In case of spillage on the skin, wash with soap and water. Avoid contamination of feed and foodstuffs. Do not use on household pets and humans. Food utensils such as teaspoons or measuring cups should not be used for food purposes after use with pesticides. Harmful if swallowed.

INTERNAL ANTIDOTE: Emetic of tablespoon of mustard in a tumbler of water. Call a physician. Keep out of the reach of children. Do not spray on plant life that is not well irrigated or when the air temperature exceeds 90 deg. F.

CONTAINER DISPOSAL: Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place.

ACTIVE INGREDIENTS	
*Technical Chlordane	45.0%
Deodorized Petroleum Distillate	50.0%
INERT INGREDIENTS	5.0%
*Equivalent to 27.0% octachloro-4, 7 methanote-trahydroindane and 18% other related compounds.
