LIGHT CARTRIDGE — INSERT IN BURROW — TOXIC GAS WILL
PENETRATE THE LAIR

NON-EXPLOSIVE USE ONLY AS DIRECTED

DEXOL GASSER is an aid to control of burrowing rodents when it can be confined to the burrow or run so they must inhale the gas.

DIRECTIONS

Be sure to open the run, hold the cartridge away from the body, light the fuse with a match or cigarette. When burning, place in the run lighted end down. Do not inhale the gas. Cover the hole entirely and if smoke issues from other openings cover them with earth also.

In working small rodents, we recommend a trowel and also a long screw driver to probe out the patterns of the burrow.

USDA REG NO 192-49

WHEN BETTER GOPHER GASSERS ARE MADE
WE WILL MAKE THEM.

INSTRUCCIONES

PELIGRO para Tusas Topas Ardillas Gopher Gasser se insierte en la madriguera. No se necesita una pala. Use una paleta angosta. Gopher Gasser arde en aire libre pero en la madriguera se evapora a humo toxico y forza el gas toxico hasta el cubil. Si no ha cubierto la entrada de la madriguera, el Gopher Gasser forzara los gases hacia arriba y al aire.

Estos gases son venenosos — deje que se despejen no se acerque.
