

For control of certain sucking and chewing insects, powdery mildew, rust and blackspot on Roses, Dahlias, Chrysanthemums and other ornamentals.

Destruxol ROSE DUST is effective in controlling insects such as exposed thrip, fullers rose beetles, Japanese beetles, bagworms, diabrotica on Chrysanthemums and Dahlias, leaf roller and aphid on Roses, and aids in the control of powdery mildew, rust and blackspot on Roses.

DIRECTION FOR USE

Use in strict accordance with label directions and Cautions. Dust thoroughly, preferably in the still air of early morning or late afternoon. It is best to dust for preventive control when new growth starts in the spring and continue every 7 to 10 days on roses as needed for Powdery Mildew, rust and blackspot. For greenhouse and flower thrip control apply this dust during the warm part of the day.

ROSE DUST

DUST AWAY

FUNGUS

& INSECTS

ON ROSES, DAHLIAS, CHRYSANTHEMUMS

For control of sod webworm and dollar spot or brown spot on lawns, scatter 1 pound of dust over each 200 sq. ft. (20 x 10) of dry lawn area, then wet thoroughly the next day. Apply at first sign of disease. Repeat 7 to 10 days as needed.
