

DEXOL TOMATO LIFE is ready to use requires no mixing and is very fast acting. It is easy to use.

DIRECTIONS FOR USE

Shake bottle well. Remove cap to release "Pop-up" nozzle. Direct nozzle and spray toward the center of blossom where ovaries are located. Although spray will not harm blossoms or foliage, saturation of plant is not recommended. Repeat spray treatment at two or three week intervals as new clusters of blossoms appear.

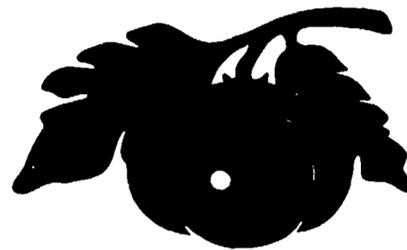

Treatment of an individual plant in excess of three applications is not recommended. Do not spray small buds. Premature treatment may cause buds to drop without opening.

Do not spray within 15 days of harvest. Do not spray when temperature is below 50° or above 75°. Do not store in sunlight. Rinse empty container thoroughly with water and discard it.

DEXOL TOMATO LIFE For Earlier Tomatoes, Less Seeds

DEXOL TOMATO LIFE is formulated to increase the setting of fruit chemically, even though weather is not conducive to natural pollination and normal growth.

Very often the weather, in the early growing stage, restricts natural pollination of early flowers. Consequently, few fruit set from these early blossoms. DEXOL TOMATO LIFE increases fruit-setting, producing earlier tomatoes with less seeds.

ACTIVE INGREDIENT

Beta Naphthoxyacetic Acid 0.00325%

INERT INGREDIENTS 99.99675%

TOTAL 100.00000%

EPA Est. 192 CA 1
EPA Reg. No. 192-113 AA
