CEPHALCHLORDANT 45% TERMITICIDE SPRAY (PROF. TERMITICIDE USE)
DIRECTIONS FOR USE

TERMITICIDE WITH INERT INGREDIENTS

For use on wood structures, including houses, barns, and other buildings, to prevent and control termite infestation. Apply as a spray to the wood surfaces to be treated.

Apply to the wood surfaces to be treated. Use the following application rates:

For general termite prevention, apply 1.0 to 1.5 gallons per 100 square feet of wood surface.

For termite control, apply 1.5 to 2.0 gallons per 100 square feet of wood surface.

For termite control in attics, apply 1.0 to 1.5 gallons per 100 square feet of wood surface.

For termite control in crawl spaces, apply 1.0 to 1.5 gallons per 100 square feet of wood surface.

For termite control in basements, apply 1.0 to 1.5 gallons per 100 square feet of wood surface.

For termite control in other areas, apply 1.0 to 1.5 gallons per 100 square feet of wood surface.

Apply in a well-ventilated area. Do not use in occupied buildings. Do not use near food or feed.
