PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION: Harmful if swallowed, inhaled or absorbed through skin. Avoid breathing spray mist. Avoid contact with skin, eyes, or clothing. Wash thoroughly after handling and before eating or smoking. Avoid contamination of food and foodstuffs. Keep children and pets off treated areas until spray mist has completely dried.

STATEMENT OF PRACTICAL TREATMENT

If Swallowed: Call a physician or Poison Control Center immediately. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Never induce vomiting or give anything by mouth to an unconscious person. **If Inhaled:** Remove victim to fresh air. Apply artificial respiration if indicated. **If On Skin:** Remove contaminated clothing. Wash affected areas with plenty of soap and water. **If In Eyes:** Flush eyes with plenty of water. Get medical attention if irritation persists. **NOTE TO PHYSICIAN:** Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. Atropine only by injection is an antidote.

ENVIRONMENTAL HAZARDS

This product is highly toxic to bees exposed to direct treatment or residues on plants. DEXOL HOME INSECT KILLER is toxic to fish, birds, and other wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not apply when weather conditions favor drift from areas treated. Apply this product only as specified on this label.

NOTICE: Buyer assumes all responsibility of safety not in accordance with directions.

Apply around trash cans, patios, sidewalks, weeds, lawns and soil areas.

DEXOL HOME INSECT KILLER

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SHAKE WELL BEFORE USING

DEXOL HOME INSECT KILLER is a water based, ready-to-use insecticide that effectively controls listed pests in and around the home. This non-staining formula can be used for spot treatment indoors on carpets, upholstery, around window and door frames, behind sinks, stoves, refrigerators as well as outdoors on porches, in garages, on weeds, lawns and soil areas. Spray surfaces until wet and repeat as needed. Spot test for color fastness before spraying.

PESTS INDOORS: Do not allow spray to contact food, foodstuffs and water supplies. Thoroughly wash dishes and food handling utensils with soap and water if they become contaminated. Remove pets and cover fish tanks before spraying.

Cockroaches, Ants, Clover Mites, Crickets, Firebrats, Silverfish and Spiders — Apply as a spot treatment only using a coarse spray to localized areas where insects are found or normally occur including dark corners of rooms and closets; cracks and crevices in walls; along and behind baseboards; beneath and behind sinks, stoves, refrigerators and cabinets; around plumbing and other utility installations. For ants, apply to ant trails, also around doors and windows and wherever else these pests may find entrance.

NOTE: A period of 4-7 days is normally required for maximum effect on cockroaches.

Carpet Beetles — Thoroughly apply as a spray along baseboards and edges of carpeting, under carpeting, rugs and upholstery in closets and on shelving, and wherever else these insects are seen or suspected.

Fleas and Brown Dog Ticks — Use DEXOL HOME INSECT KILLER as a spot treatment to infested areas such as pet beds and resting quarters, nearby cracks and crevices; along and behind baseboards, window and door frames, upholstery and localized areas of floor and floor coverings where these pests may be present. Repeat treatment in 7-10 days as necessary. Keep children and pets out of sprayed areas until dry. Old bedding of pets should be removed and replaced with clean, fresh bedding after treatment of pet area. **DO NOT TREAT PETS WITH THIS PRODUCT.** To control the source of flea infestation, pets inhabiting the treated premises should be treated with a product registered for application to animals.

PESTS OUT-OF-DOORS: **Ants, Brown Dog Ticks, Crickets, Fleas, Earwigs** — Treat localized infestations of these insects by thoroughly spraying weeds or brushy non-crop areas, shrubs, grass, or wherever these pests are found. Repeat as necessary. For ants, thoroughly wet hills and runways. **Flies, Mosquitoes:** For outdoor use only as an aid in reducing annoyance from these insects. Spray outside surfaces of screens, doors, window frames or wherever these insects may enter the room. Also treat surfaces around light fixtures on porches, in garages, and other places where these insects alight or congregate. Repeat as necessary.

STORAGE & DISPOSAL

STORAGE: Keep pesticide in original container. Store in a cool, dry place and preferably in a locked storage area inaccessible to children and pets. **DISPOSAL:** Do not reuse empty container. Wrap container in several layers of newspaper and discard in trash.
