

U.S. ENVIRONMENTAL PROTECTION AGENCY Office of Pesticide Programs Registration Division (H7505C) 1200 Pennsylvania Avenue, N W Washington, D.C. 20460

Term of Issuance

192-221

JUN 5 2006

Date of Issuance:

Conditional

EPA Reg. Number:

Name of Pesticide Product

Ultra Stop Home Insect Killer II

NOTICE OF PESTICIDE:

X Registration ____ Reregistration

(Under FIFRA as amended)

Name and Address of Registrant (include ZIP Code)

Value Garden Supply, LLC

P.O. Box 585

St. Joseph, MO 64502-0585

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be constitued as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others

This product is **conditionally** registered in accordance with FIFRA sec. 3(c)(7)(A), provided that:

- 1. You will submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.
- 2. You will make the following label changes before you release the product for shipment:
 - a) Revise the EPA Registration Number to read "EPA Reg. No. 192-221."
 - b) Add "indoors" at the end of the 3rd marketing claim listed in the front panel of the label.
 - c) Delete the claims "Keeps insects from entering your home! Keeps insects out of your home" throughout the label. Statements that imply all encompassing protection are not acceptable.
 - d) Revise the last bullet of the "If Swallowed" First Aid statements to read: "Do not give anything by mouth to an unconscious person."
 - e) Add "and before eating, drinking, chewing gum, or using tobacco" to the 4th sentence (Wash thoroughly...) under Hazards to Humans and Domestic Animals.

- f) Delete the 3rd sentence under Environmental Hazards (Do not contaminate water...). This statement is not required for spray, ready to use products.
- g) Move the sentence "This product is not intended for application to plants or lawns" from the Environmental Hazards to the Directions for Use/Before you use section of the label.
- h) Revise the second sentence under Precautionary statements to read "Causes moderate eye irritation".
- i) Add the following statement to the end of the second paragraph under Wood Infesting Pests: "For active termite infestations obtain the services of a licensed pest control operator".
- 3. Please submit three (3) copies of your final printed labeling before releasing the product for shipment. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing amended labeling constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records.

If you have any questions regarding this action, please contact Olga Odiott of my team at (703) 308-9369.

FIRST AID			
If Swallowed	Call a poison control center or doctor immediately for treatment advice.		
	Have person sip a glass of water if able to swallow.		
	Do not induce vomiting unless told to do so by a poison control center or doctor.		
•	Do not give anything to an unconscious person		
If in eyes	Hold eye open and rinse slowly and gently with water for 15 to 20 minutes		
	Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.		
	Call a poison control center or doctor for treatment advice.		
If Inhaled	Move person to fresh air.		
	 If not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mout if possible. 		
	Contact doctor or poison control center for further treatment advice		

Precautionary Statements Hazards to Humans and Domestic Animals

CAUTION Harmful if swallowed or inhaled. Causes eye irritation. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling. Avoid breathing vapors or spray mist. Remove contaminated clothing and wash clothing before reuse.

Environmental Hazards

This pesticide is highly toxic to aquatic invertebrates and fish. Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsate. This product is not intended for application to plants or lawns. Apply this product only as specified on this label.

QUICK FACTS

- Kills Ants and Roaches in Seconds
 Continues Killing Up To 9 Months Indoors
- Keeps Insects Out of Your Home
- Non-staining

KILLS Ants, Cockroaches, Fleas, Spiders and other listed pests

WHERE TO USE Indoor as spot or crack and crevice spray. Outdoor as perimeter treatment.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. For best results, read and follow all label directions.

BEFORE YOU USE	Do not spray into fish pools, ponds, streams, or lakes.
Read and follow directions when using.	Indoors, do not use as a space spray (do not spray into the air)
	Remove animal feeding dishes before spraying.
	Keep children and pets away from treated areas until spray has dried.
	Do not use on surfaces where food is prepared or where food is exposed.
	Before spraying indoors, remove birds from area and tightly cover or remove fish bowls and aquariums.

HOW TO USE

Shake Well Before Use

Indoor Use

- Hold container upright while spraying Direct nozzle about 12 inches from surface to be treated.
- Spray around baseboards, into cracks and crevices and other places where insects live and hide (under sinks, cabinets, refrigerators, damp areas, etc.) until surfaces are wet. Avoid excessive wetting of linoleum, asphalt tiles or plastic.
- For long lasting residual action leave spray undisturbed. The product will keep on killing for up to 9
 months.

Outdoor Use

- · Apply to exterior surfaces of the home.
- Spray a band 3 to 4 feet wide around and alongside the foundation and porches of the house.
- Treat soil, turf or walkways adjacent to foundation and porches. Also treat 1 to 2 feet up along the side of the dwelling
- For more serious problems, a wider band of treatment, up to 10 feet, may be necessary.
- Spray with the wind to avoid drifting of the spray onto skin or clothing.
- Treat where dissimilar building materials meet, such as where brick meets wood trim or where siding
 meets window edges or where cracks are visible or around and into any openings where utilities
 enter the home. Spray around doors and window frames
- Treat outside surfaces of garages, carports, patios, driveways and sidewalks if insects are present
- Treat other problem areas such as around wood piles, storage sheds and other areas of insect infestation as needed. Spray on ant trails and ant hills.
- For wasps, hornets, yellow jackets Application to nests should be made late in levening when insects are at rest.
- To aid in control of fire ants in lawns and other outdoor home recreation areas, thoroughly drench
 the entire mound area. Spray provides contact activity and residual in the active mound. Use a
 coarse spray and apply gently to avoid disturbing ants. Note: For best results apply in cool weather
 65 to 80^d F, or in early morning or late evening hours. Treat new mounds as they appear.

Wood Infesting Pests

- For control of termites and wood-infesting beetles found above ground, apply to voids and holes in damaged wood, and in spaces between wooden structures and between the sill plate and foundation where wood is exposed.
- Apply spray to exposed worker and winged reproductive forms of termites. This type of application is intended to be a supplemental treatment for control of drywood and above-ground subterranean termites and other wood-infesting insects, it is not intended as a substitute for soil treatments for termite control.
- For control of swarming or reproductive stages of termites, apply a coarse spray to the swarm or area on which they collect.
- For control of carpenter ants around houses and other structures, apply around doors and windows
 and other places where carpenter ants may enter the premises. Spray into cracks and crevices or
 voids where these ants or their nests are present. Use a sufficient amount of coarse spray to cover
 the area.
- For control of **carpenter bees in structures**, spray the liquid directly into bee entrance holes. Leave the entrance holes open for 24 hours to be certain that returning adult bees are killed. When there is no activity, the hole may be sealed with a suitable sealant.
