Subject: Label Notification(s) for Pesticide Registration Notice 2007-4

Dear Ms. Williams:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 dated March 18, 2011 for the following product(s):

AllPro Permethrin ICG .5% Reg. No. 192-222

The Registration Division (RD) has conducted a review of this request for applicability under PR Notice 2007-4 and finds that the label change(s) requested falls within the scope of PRN 2007-4. The label has been date-stamped "Notification" and will be placed in our records.

If you have any questions, please contact Linda A. DeLuise at 703-305-5428.

Sincerely,

A handwritten signature in black ink, appearing to read "Richard J. Gebken".

Richard J. Gebken
Product Manager

AllPro® Permethrin ICG .5%

- Kills insects in lawns
- Lawn & Garden Insect Control
- Treat up to 5,000 10,000 15,000 sq. ft.
- Controls home invading pests
- 10 pounds treats 5,000 sq. ft.
- Controls surface and foliage feeding pests
- For grass and dichondra lawns
- Contains synthetic pyrethroid
- For outdoor use on home lawns
- Contains permethrin
- Ready to use
- Provides contact residual control for up to 4 weeks

Kills – Ants, Armyworms (including Fall, Yellow striped, etc.), Bear Tick, Bermuda grass Mites, Billbugs, (adult), Black Legged Tick, Boxelder Bugs, Brown Dog Tick, Centipedes, Chiggers, Chinch Bugs, Clover Mites, Cockroaches, Crickets, Cutworms, Darkling Ground Beetles, Deer Ticks, Digger wasps, Essex Skipper, European Crane Fly Larvae, Field Crickets, Fiery Skipper, Fire Ants, Flea Beetles, (in Dichondra), Grasshopper, Hyperodes (Turfgrass Weevil), Japanese Beetle (adult), Lawn Moth, Leaf Hoppers, Lone Star Tick, Scorpions, Silverfish & Firebrats, Sod Webworms, Sowbugs, Spiders (Including Black Widow), Spittlebugs, Springtails, Vegetable weevils (in Dichondra), Western Black Legged Tick (*Ixodes pacificus*)

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact the National Pesticide Information Center 1-800-858-7378.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION: Harmful if swallowed or absorbed through skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to fish and other aquatic organisms. Do not apply directly to water. Drift and runoff from treated areas may be hazardous to aquatic organisms in treated areas. Do not contaminate water when disposing of equipment wash waters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its EPA labeling.

Not for use on plants being grown for sale or other commercial use, or for commercial seed production, or for research purposes.

READ ENTIRE LABEL BEFORE USING, USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS

AllPro Permethrin ICG .5% is recommended for control of lawn insects, fleas, ticks outdoors in residential areas. Repeated applications are made by broadcast treatment with a spreader to lawns, under shrubbery, and other ornamental and turf grass areas, band treatments are recommended around the house foundation and spot applications are made to ant mounds and wasp nests.

General Use Directions

1. Determine the size of the area to be treated – measure and multiply length times width.
2. Determine appropriate spreader setting using chart.
3. treat as directed – Through coverage is important.
4. Water in with ¼ to ½ inches of sprinkler irrigated water to release the insecticide from the granule where indicated.

- 5. Keep children and pets off treated areas until this material is washed into turf and grass is dry
- 6. Do not use food utensils such as teaspoons or measuring cups for food purposes after use with pesticides

Overall Lawn Treatment for Grass and Dichondra Lawns

To control: Ants, Armyworms (including Fall, Yellow striped, etc.), Bear Tick, Bermuda grass Mites, Billbugs, (adult), Boxelder Bugs, Brown Dog Tick, Centipedes, Chiggers, Chinch Bugs, Clover Mites, Cockroaches, Crickets, Cutworms, Darkling Ground Beetles, Deer Ticks, Digger wasps, Essex Skipper, European Crane Fly Larvae, Field Crickets, Fiery Skipper, Fire Ants, Flea Beetles, (in Dichondra), Grasshopper, Hyperodes (Turfgrass Weevil), Japanese Beetle (adult), Lawn Moth, Leaf Hoppers, Lone Star Tick, Scorpions, Silverfish & Firebrats, Sod Webworms, Sowbugs, Spiders (Including Black Widow), Spittlebugs, Springtails, Ticks, Vegetable weevils (in Dichondra).

Apply this product uniformly to home lawns, under shrubbery, and other ornamental recreational turf grass areas. Treat when insects first appear using granules at the rate of 2 pounds per 1, 000 sq. ft. using a fertilizer spreader. See spreader setting chart below. To help obtain uniform distribution, apply one-half required amount of product in one direction, then apply the balance at a right angle. Immediately after application, water the lawn lightly. Retreat after 7 days if insects are present or damage reoccurs.

European Crane fly larvae (Leatherjackets) – the best time to apply is in May or June when the insects are young.

Chinch Bugs – Start treatments when temperature reaches 80°F or above. A second application may be necessary in 6 weeks if insect activity continues.

Fleas and Tick Control (Outdoors)

In summer months, fleas and ticks frequently become established in lawns and pet resting areas surrounding the home. For best control of fleas and ticks (including but not limited to Bear Tick, Black-legged Tick, Brown Dog Tick, Deer Tick (*Ixodes dammini*), Lone Star Tick, Western Black-legged Tick, Wood Tick); a regular treatment program should be followed, Treat once a month when pests first appear in late Spring (May – June) and continue until late Summer (September – October). Fall temperatures below 50 °F decrease pest activity. Eliminating weeds around the home and mowing lawns frequently reduces the hiding places for these pests.

Note: Dogs, cats, their kennel or bedding area should also be treated with a registered product. In addition, if fleas and ticks are indoor on carpets or pet resting areas, use a registered product to treat these areas. It is very important that all three sites – outdoors, indoors and also the pet itself be treated with appropriate labeled products to achieve satisfactory control. If any of these areas are not treated it could serve as a source of reinfestation to the entire premise.

Sod Webworms (*Crambus spp.*)

Sod webworms are light brown caterpillars 1/4 to 3/4 inches long that hide in the grass during the day and feed on the grass blades at night. Adult Webworms, usually referenced to a Lawn Moths (about 1 inch in length with long snout) emerge from the grass at dusk. They fly over the lawn laying eggs that later hatch into destructive caterpillars. Damage appears first as small brown spots which, if not treated, may rapidly develop into large brown areas of severely damaged or dead grass. If Lawn Moths (Sod Webworm adults) are noticed in large numbers at dusk, or at first sign of damage to lawn, treat entire lawn evenly.

Band (Perimeter) Treatment Around House Foundation

To help prevent infestation of building by Ants, Boxelder Bugs, Brown Dog ticks, Centipedes, Cockroaches, Clover Mites, Crickets, Fleas, Scorpions, Sowbugs, Spiders (including Black Widow), Springtails (*Collembola*) and Ticks. Apply a 5-foot band of granules next to the house foundation. Distribute granules uniformly. Water lightly after application. Retreat after 7 days if insects are present.

Spot Treatment

Ants Nesting Outdoors – This product maybe used outdoors for the control of ants, including Acrobat, Argentine, Big Headed, Cornfield, Field, Harvester, Leafcutter, Little Black, Pavement and Pyramid Ants. If possible, it is best to try to locate nest and treat this first. Nests will usually be found in the ground but may be concealed under stones, boards, slabs, or in stumps or logs. Product should be applied to thoroughly cover the nest (1 to 2 teaspoons) and sprinkled gently with water. In addition to treating ant nests or mounds, entry points of buildings (used by ants) and the soil surface along the perimeter of the building should be treated,

Digger Wasps: Apply 1 to 2 teaspoons of granules in and around each individual ground nest opening. Make application at dusk when the wasps are not active.

Imported Fire Ants: Apply one cup over, and 2 feet around each fire ant mound: Immediately after application, water the granules into the soil gently with a light sprinkling to avoid disturbing the colony. Use at least one gallon of water per mound, but no more than 2 gallons. Use of high pressure watering equipment may disturb the colony and cause migration of the ants, thus reducing the effectiveness of the treatment. Apply in cool weather (65 to 80 °F) or in early morning or late evening for best results. Treat new mounds as they appear.

SPREADER SETTINGS

Spreader Make and Model	2 lbs/1000 sq. ft.	3 lbs/1000 sq. ft.
