## INSECTICIDE

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**DANGER!** Poisonous if swallowed, inhaled, or absorbed through skin. Rapidly absorbed through skin. Inhalation or skin contact may, without symptoms, progressively increase susceptibility to VAPONA insecticide poisoning.

**DONOT SWALLOW OR GET IN EYES ON SKIN OR ON CLOTHING. DO NOT BREATHE VAPORS.**

Keep out of reach of children. Do not contaminate food or feed products.

#### PRECAUTIONS IN USING

Wear clean rubber gloves, water-proof protective clothing, goggles, and a face shield. Replace gloves frequently and destroy used gloves. During prolonged exposures, wear a pesticide respirator jointly approved by the Mining Enforcement and Safety Administration (formerly U.S. Bureau of Mines) and by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part II. Wash thoroughly with soap and water after handling and before eating or smoking. If the material gets into the eyes, immediately flush with water for at least fifteen minutes and get medical attention. In case of contact, remove clothing and wash skin with soap and water, wash clothing before reuse. In case of spillage, wash down with water. Decontaminate areas and equipment by washing with a dilute solution of alkali (less than 5%) and detergent and rinse with water.

In case of a significant spill also call (713) 473-9461 or CHEMTREC (800) 424-9300.

#### NOTE TO PHYSICIAN

**WARNING SYMPTOMS:** Symptoms include weakness, headache, tightness in chest, blurred vision, non-reactive pin-point pupils, salivation, sweating, nausea, vomiting, diarrhea, and abdominal cramps.

**TREATMENT:** Atropine is the specific therapeutic antagonist of choice against para-sympathetic nervous stimulation. If there are signs of para-sympathetic stimulation, atropine sulfate should be injected at 10-minute intervals, in doses of 1 to 2 milligrams until complete atropinization has occurred. Morphine is contraindicated. Clear chest by postural drainage. Oxygen administration may be necessary. Observe patient continuously for 48 hours. Repeated exposure to cholinesterase inhibitors may, without warning, cause prolonged susceptibility to very small doses of any cholinesterase inhibitor. Allow no further exposure until cholinesterase regeneration has been attained as determined by blood test. 2-PAM is also antidotal and may be administered in conjunction with atropine. For 24-hour emergency medical assistance call (713) 473-9461.

#### STATEMENT OF PRACTICAL TREATMENT

ATROPINE IS THE EMERGENCY ANTIDOTE FOR VAPONA INSECTICIDE POISONING. CALL A PHYSICIAN IMMEDIATELY IN ALL CASES OF SUSPECTED POISONING.

**IF SWALLOWED,** induce vomiting immediately by giving two glasses of water and sticking a finger down throat. Call a physician. NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON.

**IF INHALED,** remove from exposure. Have patient lie down and keep quiet. If patient is not breathing, start artificial respiration immediately.

**IN CASE OF CONTACT** — If on skin, immediately remove patient from the vicinity of the insecticide, remove all contaminated clothing, and wash skin with soap and running water. If material gets into eyes, wash immediately with running water for at least 15 minutes.

**IF WARNING SYMPTOMS APPEAR** (See WARNING SYMPTOMS)  
Keep patient prone and quiet.  
Start artificial respiration immediately if patient is not breathing.  
Transport the patient immediately to the nearest hospital.

#### ENVIRONMENTAL

This product is toxic to fish, ponds, or public water. Use only in your Regional Office of the

It is a violation of Federal law if this pesticide may be used in a manner for which this product is not registered.

#### PROMISSIONS

Do not contaminate water. Pesticide, spray, mixtures must be disposed of in accordance with Subtitle C of the Resource Conservation and Recovery Act. Triple rinse (or equivalent) and recycle where approved landfill, or other approved method.
