## **CAUTION: KEEP OUT OF REACH OF CHILDREN.**

### PRECAUTIONS IN USING

**HARMFUL IF SWALLOWED, INHALED OR ABSORBED THROUGH THE SKIN.** Avoid breathing of spray mist. Wash thoroughly with soap and water after handling and before eating or smoking. Do not contaminate utensils, food, water or foodstuffs. If swallowed, induce vomiting immediately and get medical attention. Atropine is antidotal.

**DO NOT SPRAY DIRECTLY ON SKIN OR ON ANIMALS.** Remove birds and pets and cover fish bowls and aquaria before spraying room. Do not remain in treated areas and ventilate the area after treatment is completed. An average size room would require 15-20 second of spraying. **WARNING:** Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator.

### USE AND DIRECTIONS FOR APPLICATION

Shell 0.5% VAPONA Insecticide Space Spray is a specially prepared insecticide for use in controlling resistant and non-resistant insects in households, restaurants, theatres, food processing plants, industrial plants and warehouses.

For control of flies, mosquitoes, wasps, hornets, gnats, flying moths and other small flying insects spray upwards into four corners of room 10-15 seconds per 1000 cu. ft. of room space. An average size room would require 15-20 seconds of spraying. Close windows for about 15 minutes after treatment. To control wasps and hornets on nest, spray nest directly at night. A thorough misting around patio, barbeque, picnic tables and other outdoor spaces when the air is quiet will repel and kill annoying flying insects. Repeat as necessary.

For control of roaches, ants, ticks, silverfish, spiders, centipedes and millipedes spray cracks of woodwork, walls, floors, around doors, window frames, baseboards, behind shelving of storage areas and other places these insects may congregates, walk or hide. Spray ant trails around doors and window sills.

For control of fleas and ticks spray animal sleeping quarters freely; force insecticide into cracks in floor and about the room. Spray animal bedding. Repeat as necessary. **DO NOT SPRAY ON ANIMALS**

For control of bed bugs take bed apart and spray entire surface of bedstead, slats and springs. Spray thoroughly into cracks and joints in bedstead and on tufts and seams of mattress. Do not spray general surface of mattress. Spray on and under baseboards, moldings, cracks in floors and walls and underneath loose wallpaper and other places these insects may be found. Air mattress until completely dry, at least 4 hours before re-use.
