*Equivalent to 20.0% VAPONA® Insecticide

USDA Reg. No. _____

GENERAL DIRECTIONS

20% VAPONA® Insecticide Resin Strand is a specially prepared insecticidal formulation for use in the control of resistant and non-resistant insects.

DIRECTIONS FOR USE

Northern Fowl Mites, Chicken Mites and Lice Control

Attach Shell 20% VAPONA Resin Strand to the underside of each row of cages, lengthwise and continuously. Fasten to the cages with paper clips or any suitable fastener to keep strand in place.

42)

Agricultural Chemical Division

20% VAPONA® INSECTICIDE RESIN STRAND

High temperature, humidity and strong drafts may alter the performance but this treatment is usually effective for 10 weeks. Occasionally the strand should be wiped to remove accumulated dust and debris.

House Fly Control

For the control of flies, gnats and mosquitoes in poultry houses, milk rooms, dairy barns, calf barns, horse barns and other buildings where flies are a problem, place 30 linear feet of Shell 20% VAPONA Insecticide Resin Strand per 100 square feet of area being treated by looping the strand over rafters or stapling to the ceiling. Weather and other conditions such as extreme ventilation or strong drafts may alter the performance but this treatment is usually effective for one season. Replace strands if effectiveness diminishes.

PRECAUTIONS IN USING

CAUTION! Keep Out of Reach of Children. Do not get in mouth, harmful if swallowed. After prolonged storage, a small amount of liquid may form on the strand. Do not get liquid in eyes. Wash hands thoroughly with soap and water after handling strand. Do not contaminate feed, water or foodstuffs, milk or milking utensils.
